

Sombrero® Echinacea

It's being called "Mr. Universe" for good reason.
(And don't worry...this bodybuilder does it all naturally!)

NEW Flamenco Orange

Hot Coral

Sandy Yellow

Lemon Yellow

Salsa Red

Sombrero 1ppp (left) vs.
the other Echinacea

- **Saucy colors.** Salsa Red, Hot Coral, Lemon Yellow and the NEW Flamenco Orange... this series just keep getting hotter!
- **Bulks up fast.** Sombrero grows full, grows fast and branches like crazy. (Think "Incredible Hulk"!)
- **Flower POWER.** Super compact, tons of blooms – but, we promise, there is foliage in there, too!
- **Super tough.** Winter? Not a problem – Sombrero keeps coming back, year after year (and we're talkin' to you, Zone 4!).
- **Super fit.** Spring growers: Just 1 plant per gallon and sell the same year – skip the vernalization. Summer growers: Extremely winter-hardy and very well-branched for big bulk-up.

Beauty and brawn?
Yeah, you heard right – Sombrero's got 'em both. This is one pumped-up stunner that toughs out Winter or fast-blooms in Spring.
