## 2018 DARWIN PERENNIALS

QUALITY UNROOTED CUTTINGS PRODUCED BY DARWIN COLOMBIA

DarwinPerennials.

## BIGGER AND BETTER

Welcome to the 2018 Darwin Perennials catalog. Our breeding and product development pipeline is full and growing, with exciting new introductions that will provide you with Perennials With Staying Power™ for continued and repeat retail sales, plus performance in the garden and in patio containers.

You'll find exciting introductions like the new **Mountain Frost™ Collection Dianthus** on page XI, a great landscape border option that reblooms consistently from early Spring to Fall. **NEW Dreameria™ Armeria** on page 17 can take the heat for season-long flowering. And, we are into **GRASSES!** Check out this section on page 6 for information on a compact form of **Miscanthus** called **Bandwidth**. This dwarf ornamental grass is infertile with attractive banded foliage.

Expanding on a tried-and-true series, we have two new and one improved variety of **Sombrero® Echinacea** on page XII that offer rich colors along with the series' exceptional Winter hardiness and excellent branching. Be sure to work with your favorite root and sell supplier to order the leading echinaceas on the market, Sombrero and **Double Scoop™** (page 2), available in all liner sizes.

Darwin Perennials is also pleased to offer the fine genetics from Walters Gardens breeding program as an exclusive from Darwin Colombia. This includes popular Walters genera like **Monarda, Nepeta, Phlox** and more. Our partnership strengthens the supply chain for these perennials, and it nicely complements our own Darwin Perennials assortment.

New for this year, we've included a **Grower Resources** section on page 114, focusing on scheduling perennials for Summer through Fall flowering, so you can guarantee fresh plants at retail.

As always, we are committed to bringing you the best, from our top-quality Perennials With Staying Power, to our Darwin Perennials customer service team, to our experienced technical support and growing culture information. We look forward to helping you find bigger and better success in the perennial business!

Sincerely,

Mike Klopmeyer, General Manager 630 588-3107, mklopmeyer@darwinperennials.com

## DARWIN COLOMBIA

We have invested over \$2 million in improvements to **Darwin Colombia**, our unrooted cutting production farm outside of Bogotá, to bring you a reliable supply of outstanding genetics. We are committed to maintaining our status as a leading supplier of perennial cuttings for the North American and European markets.

The farm has reliably produced unrooted cuttings since 2002, and we continue to make a number of significant infrastructure investments, including new water treatment and storage systems, and a new fertigation system for all of our greenhouses.

We also have installed new benching throughout the farm for stock production grown in pasteurized coco fiber that allows for excellent root development, resulting in high-quality cuttings.

In addition, **we have worked to establish our 600+ varieties** in our onsite tissue culture laboratory for annual renewal of elite, pathogen-tested clean stock, along with dedicated plant pathology support for production. Like you, we're in this for the long term!

## MUST HAVE PERENNIALS™

#### TRIED & TRUSTED™

We continue to build on our relationship with Must Have Perennials as the exclusive unrooted cutting supplier of their perennial program. Must Have Perennials is the rename and relaunch of the Blooms of Bressingham program. We offer more than 40 of these high-quality varieties that have been tested for years – in gardens and pot trials – at secure trial sites, leading perennial growers, universities and botanical gardens throughout North America. These comprehensive trials establish reliability and provide valuable information on regional performance to ensure success for you and your customers.

You won't want to miss these best-performing varieties:

#### BANDWIDTH NEW FOR 2018 DARWIN PERENNIALS

Height: 30 to 36 in. (76 to 91 cm) Bloom Months: October to November USDA Hardiness Zones: 5a to 9b NCMS2B' PPAF

#### Dwarf ornamental grass with banded foliage provides interest in the garden.

• Rust resistant and infertile, for healthy, non-invasive plants in the landscape.

Liners available from Emerald Coast Growers, FL

"The new Miscanthus Bandwidth is infertile, so it won't reseed for the grower or the gardener, and its full, compact size is ideal for any yard or outdoor garden room. We placed a container of Bandwidth on a company patio this Summer, and it was a big hit here at Emerald Coast Growers. We love the bright green leaves with gold highlights. I want one of these on my balcony at home!"

Pamela Straub Key Accounts and Customer Service Manager, Emerald Coast Growers, FL Lovely blue-green foliage emerges in the Spring, maturing to a wine-red color by mid-Summer. • The perfect accent grass for large

PEROVSKIA 💛 (RUSSIAN SAGE) Perovskia atriplicifolia

#### **BLUE SPRITZER**

Height: 18 to 24 in. (46 to 61 cm) Bloom Months: July to August USDA Hardiness Zones: 4a to 9b 'Balperobritz'

 Naturally well-branched and fills a Container quickly.Lower input costs and faster turns.

#### LACEY BLUE

#### CONCEPT PLANTS, B.V.

Height: 12 to 18 in. (30 to 46 cm) Bloom Months: July to September USDA Hardiness Zones: 4a to 9b 'Lisslitt' PP20,845

- Larger flowers for more color!
- Truly dwarf variety stays small in subsequent years.
- Features the largest flowers of any Russian Sage.
- · Dense branching prevents flopping.

Perovskia 'CrazyBlue'

PEROVSKIA (RUSSIAN SAGE) Perovskia atriplicifolia

## 'CRAZYBLUE'

DARWIN PERENNIALS

Height: 16 to 18 in. (41 to 46 cm) Bloom Months: July to August USDA Hardiness Zones: 4a to 9b PP25,639

Colorado State University Flower Trial 2016 "Top Performer Perennials" Winner.

Unique interlacing branches prevent breakage during shipping.
Looks good longer at retail and in patio containers.

 Deeper blue flowers than any other Perovskia.

Very good performer with 4.6/5 average score, excellent flowering from Penn State University, Landisville, Pennsylvania, first season, 2015.

"Of all the Perovskia I've tried, CrazyBlue most floats my boat — it stole the show this year. Beautifully upright the entire season from a Spring-planted, non-vernalized plug. That's a tall order. And, it was the longest blooming in the trial!"

Paul Westervelt Annual & Perennial Production Manager, Saunders Brothers, Inc., VA

Perovskia Little Lace

Perovskia atriplicifolia

Perovskia 'Longin'

Perovskia 'Rocketman'

PEROVSKIA (RUSSIAN SAGE) Perovskia atriplicifolia

LITTLE LACE

#### DARWIN PERENNIALS

Height: 18 to 24 in. (46 to 61 cm) Bloom Months: July to September USDA Hardiness Zones: 4a to 9b 'Novaperlac' PP26,618

 Unique growth habit combines a shorter plant with great uniformity.
 Long-lasting purple flower spikes create a lot of flower power.

· A good choice for xeric areas.

One of Colorado State University's "Top Performers" for 2015 Season: Class of 2013 and Grown in 2015.

PEROVSKIA (RUSSIAN SAGE) Perovskia atriplicifolia

Height: 36 to 60 in. (91 to 152 cm) Bloom Months: July to September USDA Hardiness Zones: 4a to 9b

Spikes of light blue flowers over aromatic gray-green foliage.

#### 'ROCKETMAN'

#### NEW FOR 2018 WALTERS GARDENS

Height: 30 to 36 in. (76 to 91 cm) Bloom Months: Late Summer USDA Hardiness Zones: 4a to 9b PPAF

A narrower, upright vase-shaped habit and relatively short stature set this new Perovskia apart. Its aromatic, gray-green, non-dissected leaves line the silvery stems, which are topped with large, fluffy textured, lavender-blue flowers.

PEROVSKIA (RUSSIAN SAGE) Perovskia x hybrida

#### 'LONGIN'

Height: 36 to 42 in. (91 to 107 cm) Bloom Months: July to September USDA Hardiness Zones: 4a to 9b

Narrow, upright habit with airy spikes of lavender blooms and narrow silver leaves.

Phlox 'Blue Moon'

Phlox 'May Breeze'

### VERONICA 💛 (SPEEDWELL) Veronica longifolia FIRST GLORY

### RENE VAN GAALEN, B.V.

Height: 16 to 22 in. (41 to 56 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 8b 'Alllord' PP23,294

- Compact, highly uniform plants. Short, thick spikes of deep blue flowers
- Vernalization not required.

### FIRST KISS

#### **NEW FOR 2018** RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 9b 'Allkiss' PPAF

- Pretty pink addition to the First
- collection.
- · Long flowering.
- · Vernalization not required.

### FIRST LADY

### RENE VAN GAALEN, B.V.

Height: 16 to 22 in. (41 to 56 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 8b 'Alllady' PP23,271

- Compact plant habit.
- Sturdy, white flower spikes.
- Vernalization not required.

Veronica First Love

### FIRST LOVE

### RENE VAN GAALEN, B.V.

Height: 22 in. (56 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 9b 'Allove' PPAF

- Uniform, short spikes of brilliant pink flowers
- Short and well-branched plants.
- Excellent flower canopy without vernalization.

### FIRST MATCH

### NEW FOR 2018 RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 9b 'Allvglove' PPAF

- Attractive dark pink addition to the First collection.
- Long flowering.
- Vernalization not required.

### FIRST MEMORY

### NEW FOR 2018 RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) Bloom Months: Late Spring to Summer USDA Hardiness Zones: 4a to 9b 'Allv1461' PPAF

- Nice, soft blue addition to the First collection.
- · Long flowering.
- Vernalization not required.

PROGRAMMABLE AND EASY TO PRODUCE: MUSIC TO A GROWER'S EARS!

Veronica 'Blue Skywalker'

### VERONICA 🔵 (SPIKE SPEEDWELL) Veronica hybrida

### MOODY BLUES® SERIES

DARWIN PERENNIALS Height: 12 to 14 in. (30 to 36 cm) Bloom Months: June to October USDA Hardiness Zones: 4a to 9b

### Compact series of first-year-flowering Veronica.

- Excellent 1-gallon production with great uniformity and habit.
- Continues to cycle and bloom all season until first frost.
- Compact, tidy habit is great for any garden or mixed container.
- No vernalization required.

# Noted for superior performance by Colorado State University trial in 2015.

Dark Blue 'Novaverblu' PP26,602 Mauve 'Novavermau' PP26,621 Pink 'Novaverpin' PP25,748 Sky Blue 'Novaversky' PP27,835 White 'Novaverwhi'

### VERONICA 💛 (SPEEDWELL) Veronica longifolia

### 'BLUE SKYWALKER'

### NEW FOR 2018 WALTERS GARDENS

Height: 28 to 30 in. (71 to 76 cm) Bloom Months: Summer USDA Hardiness Zones: 4a to 9b PPAF

This taller perennial provides height in the garden without too much horizontal space. Lavender-blue flower spikes cover the top half of an incredibly upright, dense habit of dark green leaves.

Veronica 'Perfectly Picasso'

VERONICA (SPEEDWELL) Veronica longifolia

### 'PERFECTLY PICASSO'

NEW FOR 2018 WALTERS GARDENS

Height: 22 to 26 in. (56 to 66 cm) Bloom Months: Summer USDA Hardiness Zones: 4a to 9b PPAF

Paintbrush-like spikes produce white buds that open to medium pink flowers, creating a bicolor look. Attractive flowers cover the top half of the plant, showing off its healthy medium green leaves on a beautifully rounded habit.

### 'ROYAL REMBRANDT'

### NEW FOR 2018 WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm) Bloom Months: Summer USDA Hardiness Zones: 4a to 9b PPAF

Discover your new Speedwell staple! Violet-purple flowers cover the top half of the plant, showcasing its dark green foliage. A remontant variety; sheering will encourage reblooming later in the season.

Veronica 'Royal Rembrandt'

### 'VERY VAN GOGH'

NEW FOR 2018 WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm) Bloom Months: Summer USDA Hardiness Zones: 4a to 8b PPAF

A posh perennial with a unique color palette. Paintbrush-like, rosy purple flowers appear on well-branched scapes. Many secondary spikes extend the bloom time. Bright green, upright clumping foliage.

VERONICA (SPEEDWELL) Veronica x hybrida

### 'PURPLEICIOUS'

### DARWIN PERENNIALS

Height: 16 to 20 in. (41 to 51 cm) Bloom Months: June to August USDA Hardiness Zones: 5a to 8b PP17,639

Long-blooming variety with intense purple flowers and dark green foliage.
Well-branched plants have a strong, tidy habit.

• Very healthy, disease-free cultivar.

Veronica 'Very Van Gogh'

VERONICA (SPEEDWELL) Veronica spicata

### 'GILES VAN HEES'

Height: 4 to 6 in. (10 to 15 cm) Bloom Months: June to August USDA Hardiness Zones: 4a to 8b

Dwarf form with dark green foliage and short, bright pink flower spikes.

Veronica 'Giles Van Hees'

Veronica 'Waterperry Blue'

Veronica 'Whitewater'

VERONICA (SPEEDWELL) Veronica peduncularis

### 'WATERPERRY BLUE'

Height: 4 to 6 in. (10 to 15 cm) Bloom Months: June to September USDA Hardiness Zones: 3a to 8b

Spreading habit with light blue flowers and purple Winter foliage.

### 'WHITEWATER'

CHICAGOLAND GROWS, INC.

Height: 4 to 6 in. (10 to 15 cm) Bloom Months: June to September USDA Hardiness Zones: 4a to 8b PP22.783

Sport of 'Waterperry Blue' produces bright white flowers on burgundy-green foliage.

Veronica Goldwell

### 'GEORGIA BLUE'

Height: 8 in. (20 cm) Bloom Months: March to April USDA Hardiness Zones: 5a to 8b

Dense, gray-green, low-growing foliage has taller flowering stems covered with intense blue flowers.

VERONICA – (SPEEDWELL) Veronica prostrata

### GOLDWELL MUST HAVE PERENNIALS™

Height: 4 in. (10 cm) Bloom Months: June to September USDA Hardiness Zones: 5a to 9b

Verbrig' PP17,423 Blue-purple flowers over narrow green

leaves edged in gold.

VERONICA (CREEPING SPEEDWELL) Veronica repens

### 'SUNSHINE'

Height: 1 to 4 in. (3 to 10 cm) Bloom Months: June to July USDA Hardiness Zones: 4a to 8b

Groundcover type, creeping with white blooms on gold foliage.

Vinca 'Illumination'

### VINCA (MYRTLE) Vinca minor

### 'BOWLES CUNNINGHAM'

Height: 5 to 8 in. (13 to 20 cm) Bloom Months: April to May USDA Hardiness Zones: 3a to 9b

Also known as 'Bowles'. Vigorous, spreading variety has thick, glossy leaves and sky blue flowers that are darker than standard *V. minor*.

### 'ILLUMINATION'

PLANTHAVEN, INC.

Height: 4 in. (10 cm) Bloom Months: April to May USDA Hardiness Zones: 4a to 9b PP12,132

Popular, low-growing, evergreen groundcover has variegated foliage and small, light lavender-blue flowers in Spring.

# HALO

## DARWIN PERENNIALS

HEAVENLY BICOLOR BLOOMS LAST THROUGH THE SUMMER AND COME BACK IN SPRING.

Viola Halo Lilac

Viola 'Etain'

# CULTURE GUIDE AHANDY REFERENCE TO HEI P YOU GROW THE EINEST PERENNIALS IN THE INDUSTRY.

# GROWER RESOURCES & FINISHING TRIALS

Top to Bottom: Salvia 'Blue Marvel' , Lavender SuperBlue, Heliopsis 'Sunstruck'

### **FROM START TO FINISH**

We are working to provide solutions for your growing challenges. Resources like our finished culture research program at our facility in West Grove, PA, provide detailed schedules and finishing protocols for many of our Darwin Perennials varieties. We offer this information to give you everything you need to schedule flowering perennials for Spring, Summer and early Fall finishing. Our goal is to help you bring fresh, flowering plants to retail when you want them.

These protocols do not require specialized growing environments, and these varieties respond consistently to these schedules. We have completed close to 50 variety specific culture trials from 2014 through 2016, and are continuing in 2017. You can review these easyto-use schedules along with even more culture and grower support information at darwinperennials.com.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Low to moderate	50-75 ppm N	Not necessary, remove premature flowers.	28-35 days after sticking	Do not over-mist.
Low to moderate	50-75 ppm N	Not necessary, remove premature flowers.	28-35 days after sticking	Do not over-mist.
Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Stick cuttings the day of arrival, if possible.
Low	50-75 ppm N	Recommended.	35-42 days after sticking	This alyssum requires light mist and soil moisture. Can be rooted under a dome or tent. Do not over-mist.
Low	100 ppm N starting at Day 7	Not necessary.	42-45 days after sticking	Quite easy to propagate. Do not over-mist. Remove from mist after 10 to 12 days. Allow media to dry slightly between irrigations to encourage root development.
Low	50-75 ppm N	Recommended.	35-42 days after sticking	Do not over-mist. Long days in propagation will hasten rooting and plant development.
Low	50-75 ppm N	Recommended.	35-42 days after sticking	Do not over-mist. Long days in propagation will hasten rooting and plant development.
Low to moderate	50-75 ppm N after 14 days	Not necessary.	35-42 days after sticking	Campanula typically have longer leaf petioles. Avoid dehydration during the first 3 days after sticking, then use a low to moderate mist regime. Avoid sticking cuttings too deep so that growing tip is exposed.
Low to moderate	50-75 ppm N	Not necessary in liner stage.	35-42 days after sticking	Discontinue mist as quickly as possible once rooting occurs.
Low	50-75 ppm N	Not necessary.	35-42 days after sticking	Use low mist and media moisture levels to avoid stem rot.
Moderate	50-75 ppm N	Pinch once in the liner stage.	28-35 days after sticking	Begin fertilizing 7 days after stick. Avoid over-misting.
Moderate	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Moderate	50-75 ppm N	Pinch once in the liner stage.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Very low	50 ppm N starting at Day 7	Pinch to remove any flower buds.	42-49 days after sticking	Dianthus require very low mist settings to root. Over- misting will result in slow rooting and high losses in propagation.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Low to moderate	50-75 ppm N	Not typical in propagation.	42-49 days after sticking	Foxlight Digitalis root slowly with first roots showing 15 to 18 days after stick. However, it is best to discontinue mist prior to visible root, as they root more quickly when not over-misted and when media is allowed to dry slightly between waterings.
Low	Begin feeding 50-75 ppm 10 days after sticking	Pinch 21-25 days after sticking.	42-49 days after sticking	Don't oversaturate media. Low mist levels work best.
High for first few days, then reduce to moderate.	50-100 ppm N	Recommended.	42-49 days after sticking	
Low	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	75-100 ppm N when roots become visible; increase to 150–200 ppm N as roots develop	Yes, 7 days before transplanting.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	50-75 ppm N when roots become visible.	are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low	Feed at 100 ppm N after 9 days	Pinch once shoots elongate for best branching.	35-42 days after sticking	Typically remove from propagation area after two weeks. Don't keep rooting media excessively wet. Use long-day lighting when propagating when day length is less than 12 hours.
Low	50-75 ppm N when roots become visible.	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation. Long day obligate plant. Must provide long days in propagation.
Low to moderate	50-75 ppm N when roots become visible.	Recommended after roots are established. Leave active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	50-75 ppm N when roots become visible.	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	100 ppm N starting at Day 10	Yes, pinch after 4 weeks. Can be double pinched in the liner stage for even greater branching.	42-49 days after sticking depending on number of pinches	Iberis benefit from a basal IBA dip prior to sticking. Do not over-mist or high losses can occur.
Low; prefers high humidity to mist	50-75 ppm N	Recommended.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low; prefers high humidity to mist	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low	50-75 ppm N	Not typically necessary.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	75-100 ppm N starting at Day 7	Pinch while young plants are soft and actively growing.	35-42 days after sticking	Pinch any premature buds as they become visible.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Moderate	50-75 ppm N	Recommended.	28-35 days after sticking	Do not oversaturate rooting media. Use long-day lighting when day length is less than 12 hours to keep plants actively growing.
Moderate	50-75 ppm N	Recommended.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Moderate to high for first 24 hours, then reduce to low.	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low.	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low.	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low.	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low.	50-75 ppm N after 10 days	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Low to moderate	75-100 ppm N starting at Day 7	Yes, while young plants are soft and actively growing.	42-49 days after sticking	Plants grow more actively under long days. Use 13-hour extended day lighting for Winter propagation.
Moderate	75-100 ppm N when roots become visible; increase to 150–200 ppm N as roots develop.	Recommended after roots are established.	35-42 days after sticking	Use low mist settings; do not over-saturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt.
Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt. Begin feeding 7 days after sticking with 75-100 ppm N.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
	50-75 ppm starting at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Over-misting and saturated propagation media will dramatically delay rooting and increase rooting losses. Discontinue mist as quickly as possible and only mist to avoid leaf wilt.
	75-100 ppm N starting at Day 10	Typically not necessary. Remove premature flower buds as they appear.	42-49 days after sticking	Scabiosa cuttings are sensitive to over-misting and over-watering in propagation.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Moderate for first 24-48 hours, then reduce to low.	50-75 ppm N at Day 7	Soft pinch recommended 25-28 days after sticking.	35-42 days after sticking	Excessive media moisture will slow rooting. Begin fertilizing at Day 7 with 75 ppm N.

## DARWIN PERENNIALS ESSENTIAL CULTURE GUIDE

### UPON RECEIPT

Unrooted perennials should be stuck as quickly as possible. Tender cuttings such as Artemisia, Agastache, Lavandula, Perovskia and Salvia should be immediate priority. Cuttings that cannot be stuck immediately should be maintained in a cooler at 40 to 45°F (4 to 7°C). Refer to the Propagation Guide for crop-specific suggestions. Generally speaking, herbaceous perennials benefit from a basal stem dip of IBA rooting hormone to speed up the rooting process. Be careful with misting levels. Perennials suffer from receiving too much mist more often than from too little mist.

Rooted perennials should be unpacked and inspected for active root growth. It is often preferable to place recently received perennial liners on a bench or the ground for a few days to help them overcome transport stress. This is particularly important for liners that have been shipped in boxes. Water on arrival and look for new root activity prior to transplant, if possible.

### AT TRANSPLANT

Well-rooted and toned perennial liners are able to withstand transplant stress very well. Critical to success, provide newly transplanted perennials with immediate irrigation. Watering at the end of the transplant line rather than after you've filled a bed greatly improves uniformity of new root establishment. In any case, do not allow media surface to dry after transplant for the first several days until new roots are extending into the media. Perennials do not like to be planted too deep. Generally speaking, perennial liners should be planted level with the soil surface.

Use a well-drained media containing properly composted bark. These types of perennial soil media are readily available. It is important that the media incorporates a surfactant to help ensure proper wetting and re-wetting of the media. The media should be stabilized to a pH of 5.8 to 6.2 and an EC of 1 to 1.2 using the Saturated Media Extract (SME) method.

### FERTILIZATION

Perennials can be fed using liquid fertilizers on a periodic or constant feed basis. Liquid fertilizer rates can be found in the Perennial Finishing Guide. Use a balanced formula that complements the pH and alkalinity of your irrigation water. Liquid fertilizing offers advantages of greater flexibility and control over fertility levels, but can be difficult to administer economically when overhead irrigation is used. In the case of overhead irrigation, controlled release fertilizers (CRF) are preferable. Incorporate CRF into the media prior to planting based on manufacturer's recommendations or top-dress after planting.

### SPACING

Spring-planted perennials should be spaced to finished spacing after transplant. This allows better growing conditions and helps to avoid overcrowding and stretch. The added airflow will help reduce foliar diseases and allow for better insect control.

Fall-planted perennials can be spaced at transplant in temperate climates or placed pot-tight in climates where temperatures cause containers to freeze. In either case, proper spacing for the anticipated finished size of the plant will dramatically improve plant quality and reduce labor.

### INSECTS AND DISEASES

Incoming perennial liners or cuttings should be inspected for pests and diseases. Apply appropriate treatments as needed.

After transplant, regular scouting and careful observation is critical to maintaining a healthy crop. The practice of integrated pest management (IPM) will reduce losses and pesticide costs by identifying and correcting problems before they escalate. If a pesticide treatment is necessary, please refer to the manufacturer's label regarding proper usage. It is always a good practice to test new varieties for phytotoxicity when making pesticide applications.

### VERNALIZATION AND BULKING

A number of perennial species require a period of cold temperature exposure to flower. The length of time varies from just a few weeks below 50°F (10°C) to as much as 10 weeks below 40°F (4°C). Generally speaking, early Spring-flowering perennials like *Phlox subulata*, Iberis and Alyssum require a cold period to flower. Many perennials such as *Salvia nemorosa*, Monarda and *Phlox paniculata* do not require vernalization to flower, but do benefit from a cold, short day bulking period. In these cases, Summer or Fall planting increases root and crown mass and the corresponding flowering shoots on the plants. It has also been shown to hasten flowering in many species by up to four weeks.

### OVERWINTERING

The keys to success when overwintering perennials are:

Avoid standing water

- Provide adequate air circulation
- Preventative disease treatments
- Dead leaf/tissue removal
- Rodent control
- Low media EC when entering dormancy
- Avoid freeze and thaw cycles

The overwintering area, whether in a field or hoop-house, should be sloped so that rain or other water sources cannot accumulate. In climates where Winter conditions freeze and thaw, cover prior to freeze and uncover as soon as possible. Where temperatures remain below freezing, cover after first freeze and maintain the cover until late Winter or early Spring when weather moderates. Remove dead and abscising leaves from herbaceous perennials like Hosta, Monarda, Heliopsis and dormant Hemerocallis. Apply a broad spectrum fungicide prior to covering or closing hoop houses to reduce disease pressure.

Once weather conditions moderate, be sure to scout for insect and disease problems and respond accordingly. Also, check pH and EC levels in the media. Perennials that emerge from dormancy will begin to grow rapidly, and the lack of adequate nutrition will lead to reduced branching, lower leaf loss and smaller flowers.

### TERMS & CONDITIONS OF SALE

NOTE: DARWIN PERENNIALS IS A DIVISION OF BALL HORTICULTURAL COMPANY (BALL). DARWIN PERENNIALS **TERMS & CONDITIONS** OF SALE ARE COUNTRY/ **REGION SPECIFIC. VISIT** DARWINPERENNIALS.COM FOR CURRENT TERMS & CONDITIONS. THE FOLLOWING TERMS & CONDITIONS OF SALE APPLY TO UNROOTED CUTTINGS OR ROOTED LINERS SOLD BY BALL WITHIN THE UNITED STATES AND CANADA.

### ACCEPTANCE OF TERMS

These terms and conditions shall govern orders for plants, supplies and other materials (merchandise) placed with Seller. All negotiations with sales representatives or other agents of Seller are merged herein. No modification of these terms and conditions shall be effective unless in writing signed by Seller. Placement of the order shall constitute Purchaser's acceptance of these terms and conditions. All orders are subject to acceptance by Seller at our offices in West Chicago, Illinois.

### LIMITATION OF WARRANTY

Seller warrants, to the extent required by law that merchandise conforms to the description appearing in Seller's catalog and on container labels, within recognized tolerances. SELLER MAKES NO OTHER OR FURTHER WARRANTY, EXPRESS OR IMPLIED. ALL OTHER OR FURTHER WARRANTIES INCLUDING ANY WARRANTIES OF MERCHANTABILITY, TITLE, NON-INFRINGEMENT, AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. Certain merchandise may be separately warranted by the manufacturer. Seller does not adopt or ratify any manufacturer warranties, express or implied, and Seller shall have no liability thereunder. Seller does not adopt or ratify any manufacturer warranties, express or implied made by Purchaser upon resale of the merchandise, and Seller shall have no liability thereunder.

### LIMITATION OF REMEDY

PURCHASER'S SOLE AND EXCLUSIVE REMEDY SHALL BE REFUND OF THE PURCHASE PRICE. SELLER'S LIABILITY, WHETHER FOR BREACH OF CONTRACT, BREACH OF WARRANTY, NEGLIGENCE, PRODUCTS LIABILITY OR ANY OTHER THEORY OF LIABILITY, IS LIMITED TO THE AMOUNT OF THE PURCHASE PRICE, UNDER NO CIRCUMSTANCES SHALL SELLER BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE, OR FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

### MANDATORY ARBITRATION

ANY CLAIM WHICH PURCHASER MAY HAVE AGAINST SELLER ARISING OUT OF OR RELATING TO THE SALE OF THE MERCHANDISE SHALL BE SETTLED BY BINDING ARBITRATION IN ACCORDANCE WITH THE COMMERCIAL ARBITRATION RULES OF THE AMERICAN ARBITRATION ASSOCIATION, SAID ARBITRATION TO BE VENUED IN COOK OR DUPAGE COUNTIES, ILLINOIS.

### GOVERNING LAW, JURISDICTION & VENUE

The laws of the State of Illinois, including but not limited to the Uniform Commercial Code as adopted therein, shall govern all matters arising out of or relating to Seller's sale of merchandise. ANY DISPUTE NOT SUBJECT TO ARBITRATION AND ANY ACTION TO ENFORCE AN ARBITRATION AWARD ARISING OUT OF OR RELATING TO THE SALE OF MERCHANDISE HEREUNDER SHALL BE MAINTAINED IN THE STATE OR FEDERAL COURTS LOCATED IN DUPAGE OR COOK COUNTIES, ILLINOIS, AND PURCHASER SUBMITS TO THE JURISDICTION OF AND VENUE IN SAID COURTS.

### INDEMNITY

By accepting merchandise, Purchaser agrees to defend Seller, to hold it harmless and indemnify it from and against any claim or loss asserted by any or all transferees of such merchandise or users of the products of such merchandise who are not notified by Purchaser in writing of Limitation of Warranty, Limitation of Remedy, Mandatory Arbitration, Governing Law Jurisdiction and Venue in language substantially equivalent to that contained in these Terms and Conditions of Sale.

### PRICES

All prices are subject to change without notice. The price in effect at time of shipment will prevail. Prices do not include installation; Seller takes no responsibility, and shall have no liability for installation. Additional processing and handling charges may be added.

### PAYMENT

Payment is due in invoiced currency and in accordance with the terms specified on invoice. In the event of default in the payment of any amount when due, and in addition to all other rights and remedies available to Seller, SELLER SHALL BE ENTITLED TO COLLECT A LATE CHARGE OF 2% PER MONTH (24% PER YEAR) OR THE MAXIMUM RATE ALLOWED BY LAW, WHICHEVER IS LESS ON ALL AMOUNTS PAST DUE FROM THE DATE DUE UNTIL THE DATE PAID. A FEE OF \$25.00 WILL BE CHARGED FOR ANY RETURNED CHECK, DECLINED EFT TRANSACTION OR DECLINED BANKCARD TRANSACTION

If paying by Pre-Authorized Debit (PAD), or EFT, please note you have waived your right to receive pre-notification of the amount of the PAD and agreed that you do not require advance notice of the amount of PADs before the debit is processed. You have certain recourse rights if any debit does not comply with these terms. For example, you have the right to receive a reimbursement for any PAD that is not authorized or is not consistent with this PAD agreement. To obtain more information on your recourse rights, contact your financial institution.

### FREIGHT & HANDLING CHARGES, INSPECTION, DAMAGED GOODS

The freight and handling charge on Purchaser's invoice covers shipment of the merchandise to Purchaser's destination, and replacement or credit for damaged merchandise if the steps listed here are followed. PURCHASER WILL NOT REFUSE OR RETURN GOODS OR THE **RIGHT TO FILE A CLAIM IS LOST** AND PURCHASER WILL STILL BE LIABLE FOR THE MATERIAL AND THE FREIGHT. When Purchaser receives shipment: 1) Count all cartons. 2) Inspect all cartons for external damage. 3) Check for open or resealed cartons. 4) Note any damages, shortages, open or resealed cartons on the delivery receipt; the carrier's representative must also sign the receipt. 5) Open all boxes immediately and inspect for damage such as scorched. frozen or broken plants; material shortages; etc. NOTIFY SELLER

IMMEDIATELY IF A SHIPMENT IS DAMAGED. Call your sales representative to report the damage and receive details on what is needed to file a claim.

### CANCELLATION POLICY

Cancellations for unrooted cuttings must be received at least thirty (30) days prior to scheduled ship date. Cancellations for liners must be received prior to stick or sow date.

### **NOTICE & RETURN**

Seller shall have no liability for any defect unless notice is given promptly, not to exceed thirty (30) days after such defect is or should have been discovered. No merchandise may be returned without Seller's prior written authorization.

### DELAYS, SHORTAGES & SUBSTITUTIONS

Seller shall not be responsible for delays in delivery or for losses resulting from such delays. Seller reserves the right to make partial shipment. In the event of shortages, Seller may substitute such other, similar merchandise as is available.

### PLANT PROTECTION

Varieties described herein may be covered by the Flowering-Only License Agreement, United States Plant Patents, Utility Patents, and/ or Plant Breeders Rights. These varieties may not be reproduced without authorization. The breeder or authorized representative has the right to inspect customers' nurseries during normal business hours to assess compliance with the restrictions on use of protected varieties.

### TRADEMARKS

 ® denotes a U.S. registered trademark and <sup>™</sup> denotes a trademark of Ball Horticultural Company, unless otherwise indicated.

### SALES LIMITATIONS

THE COMPANY'S PRODUCTS MAY NOT BE SOLD, DIVERTED, TRANSFERRED OR RE-EXPORTED, DIRECTLY OR INDIRECTLY, TO ANY INDIVIDUAL, ENTITY, OR DESTINATION THAT IS SUBJECT TO UNITED STATES OR UNITED NATIONS SANCTIONS PROGRAMS OR EMBARGOS (INCLUDING BUT NOT LIMITED TO OFAC SANCTIONS PROGRAMS AND THOSE LISTED ON OFAC'S "SPECIALLY DESIGNATED NATIONALS" LIST) WITHOUT AN APPROPRIATE EXPORT LICENSE.

ALL FOREIGN SHIPMENTS MUST BE SHIPPED IN COMPLIANCE WITH THE FOREIGN CORRUPT PRACTICES ACT AND THE UK BRIBERY ACT.

### DARWIN PERENNIALS LINER SUPPLY

Easily source your perennial needs from these reliable North American suppliers licensed to carry Darwin Perennials varieties.

### LICENSED SUPPLIERS
