2019 DARWIN PERENNIALS®

PERENNIALS WITH STAYING POWER™

2019 DARWIN PERENNIALS

STAYING POWER

Welcome to the 2019 Darwin Perennials catalog. The Darwin introductions included within were developed from years of breeding and searching the globe to find the best possible Perennials with Staying Power $^{\text{TM}}$. Our goal is to offer perennials with outstanding flowering and landscape performance that meet the needs of today's retail, landscape and nursery segments.

Inside, you will also find our extensive array of genetics available in multiple forms, including unrooted cutting production from our farm in Colombia, as well as tissue-culture-raised plugs, grasses and more. Our Colombian farm has reliably supplied the industry for more than 15 years. In addition, we have an exciting offering from leading breeders that feature Darwin Perennials genetics, including **Walters Gardens** and **Must Have Perennials**®, as well as all your favorite varieties. All of this makes Darwin Perennials a one-stop shop for all your perennial needs.

In this catalog, take a look at some of our breakthrough introductions like Salvia 'Blue by You', a hardy hybrid Salvia with vibrant, long-lasting flowers that repeat blooms from Spring to Fall. Or, check out one of our new series, Helenium Salud™, which brings excellent Summer and Fall color to any retail operation or landscape. Another notable new product includes Salvia 'Sky Blue Marvel'. It's a wonderful addition to popular 'Rose Marvel' and 'Blue Marvel'. And, the outstanding Coreopsis UpTick™ series remains an exclusive product from Ball Seed.

Be sure to note our expanded culture section, which includes schedules and trialing protocols as well as regional top picks. We've trialed over 60+ different Darwin Perennials varieties to provide growers with a roadmap for bringing fresh perennials into color from Spring to Fall.

Finally, for ordering information and more, turn to your Darwin Perennial team of experts and your knowledgeable Ball Seed® Sales Representative, who are all ready to serve you!

Sincerely,

Leland Toering

Sales and Marketing Manager 630 588-3127, LToering@ballhort.com

DARWIN FARM - COLOMBIA

FOCUSED ON RELIABILITY

Our focus is on ensuring a reliable supply of outstanding genetics from Darwin Colombia, our unrooted cutting production farm outside of Bogotá. Here are some of our investments and areas of concentration:

Clean Stock Program (to ensure healthy, disease-free products)

• Initiation and maintenance of entire assortment into on-site Tissue Culture Lab.

Production Planning (to ensure order fulfillment and inventory)

- · Ability to trace all of our products forward and backward in the supply chain.
- Expanding and building new greenhouses to reliably meet your perennial needs for the future.

Post-Harvest Cold Chain (to ensure quality cuttings from harvest throughout entire process)

- · Construction (completed in 2018) of a new, temperature-controlled cold room to maintain cold chain from harvest through shipment.
- · Construction (completed in 2018) of a new packing area designed with lean flow efficiencies to maximize order-fill and packing accuracy.

Concentrating on reliability confirms our commitment to remain the leading supplier of perennial cuttings for the North American market.

Darwin Perennials.

MUST HAVE PERENNIALS®

TRIED & TRUSTED™

We continue to build on our relationship with Must Have Perennials, a brand that brings new, innovative perennials to the market. Darwin Perennials is the exclusive unrooted cutting supplier of their perennial program. We also offer more than 40 of these high-quality varieties that have been tested for years - in gardens and container trials - at secure trial sites, leading perennial growers, universities and botanic gardens throughout North America. These comprehensive trials establish reliability and provide valuable information on regional performance to ensure success for you and your customers.

Don't miss these best-performing varieties in this year's catalog:

ΧI

Darwin Perennials products are also bred to be well-behaved and manageable, requiring minimal maintenance. For example, Nepeta Junior Walker™ – a third the size of its popular parent, 'Walker's Low' – stays neat and tidy and doesn't require shearing. It was selected as a Colorado State top performer in 2012. Or, Perovskia 'CrazyBlue' offers interlacing branches which prevent breakage during heavy rainfall.

In addition, Darwin Perennials varieties bring exceptional color and interest to landscapes. Tough and reliable, they can be mixed and matched to deliver a variety of hues and textures throughout the season, along with excellent weather tolerance.

HERE IS A SAMPLING OF SOME OF OUR GO-TO VARIETIES FOR THE LANDSCAPE:

AGASTACHE (ANISE HYSSOP)

Agastache aurantiaca

'MANGO TANGO'

WALTERS GARDENS

Height: 16 to 18 in. (41 to 46 cm) Bloom Months: Late Summer USDA Hardiness Zones: 6a to 9b PP28.747

Selected for its compact habit and vibrant flower color. Overall, the plant has a rich, mango-orange color. Individual flowers have dusky rose calyxes and light peach to dusky orange flowers. A deeper shade of orange than 'Peachie Keen'. Flowers cover the top three-quarters of the plant.

AGASTACHE (ANISE HYSSOP)

Agastache rupestris

'PEACHIE KEEN'

WALTERS GARDENS

Height: 20 to 24 in. (51 to 61 cm) **Bloom Months:** Late Summer **USDA Hardiness Zones:** 6a to 9b PP25,886

Densely compact, rounded clump of aromatic, bright green foliage is topped with loads of apricot-peach flowers with complementary purplish-pink calyxes. Flowers for many months beginning in mid-Summer (earlier in warmer zones). Easy to grow.

'ROSIE POSIE'

WALTERS GARDENS

Height: 18 to 22 in. (46 to 56 cm) Bloom Months: Mid to Late Summer USDA Hardiness Zones: 6a to 9b PP25.857

Densely compact, rounded clump of aromatic, bright green foliage is topped with loads of hot pink flowers with magenta-purple calyxes. Flowers for many months beginning in mid-Summer (earlier in warmer zones). Easy to grow.

DARWIN PERENNIALS

Height: 30 to 36 in. (76 to 91 cm) Bloom Months: October to November

USDA Hardiness Zones: 5a to 9b

Available as a liner only 'NCMS2B' PPAF

Dwarf ornamental grass with banded foliage provides interest in the garden.

· Rust resistant and infertile, for healthy, non-invasive plants in the landscape.

"The new Miscanthus Bandwidth is infertile, so it won't reseed for the grower or the gardener, and its full, compact size is ideal for any yard or outdoor garden room. We placed a container of Bandwidth on a company patio this Summer, and it was a big hit here at Emerald Coast Growers. We love the bright green leaves with gold highlights. I want one of these on my balcony at home!"

Pamela Straub Key Accounts and Customer Service Manager, Emerald Coast Growers, FL

PEROVSKIA (RUSSIAN SAGE)

Perovskia atriplicifolia

'BLUE JEAN BABY'

WALTERS GARDENS

Height: 28 to 34 in. (71 to 86 cm) **Bloom Months:** August **USDA Hardiness Zones:** 4a to 9b

A shorter, manageable Russian Sage that is still vigorous in the landscape and production. Lavender blue flowers held in smoky purple calyxes bloom for a long period starting in midsummer, with the color from the calyxes extending appeal into fall.

LACEY BLUE

CONCEPT PLANTS, B.V.

Height: 12 to 18 in. (30 to 46 cm) Bloom Months: July to September USDA Hardiness Zones: 4a to 9b

'Lisslitt' PP20,845

- Larger flowers for more color!
- Truly dwarf variety stays small in subsequent years.
- Features the largest flowers of any Russian Sage.
- Dense branching prevents flopping.

Perovskia 'Blue Jean Baby'

Perovskia 'Rocketman'

'ROCKETMAN'

WALTERS GARDENS

Height: 30 to 36 in. (76 to 91 cm) Bloom Months: Late Summer USDA Hardiness Zones: 4a to 9b

A narrower, upright vase-shaped habit and relatively short stature set this new Perovskia apart. Its aromatic, gray-green, non-dissected leaves line the silvery stems, which are topped with large, fluffy textured, lavender-blue flowers.

Perovskia Lacey Blue

Perovskia atriplicifolia

PEROVSKIA (RUSSIAN SAGE)

Perovskia atriplicifolia

Height: 36 to 60 in. (91 to 152 cm) **Bloom Months:** July to September **USDA Hardiness Zones:** 4a to 9b

Spikes of light blue flowers over aromatic gray-green foliage. Standard variety Perovskia.

73

Height: 8 in. (20 cm) Bloom Months: June to July USDA Hardiness Zones: 4a to 9b

Drought-tolerant, low-growing and spreading variety with soft and fuzzy, oval, gray-white leaves.

STACHYS (LAMB'S EAR)

Stachys monnieri

'HUMMELO'

Height: 20 in. (51 cm) Bloom Months: June to July USDA Hardiness Zones: 4a to 8b

Compact clumps of textured, glossy green foliage with spikes of purple flowers.

STEVIA (STEVIA)

Stevia rebaudiana

Height: 18 to 30 in. (46 to 76 cm) **Bloom Months: None** USDA Hardiness Zones: 9a to 11

Tender perennial used as a dietary supplement; dried leaves are many times sweeter than sugar.

TEUCRIUM ((GERMANDER)

Teucrium chamaedrys

Height: 12 in. (30 cm) Bloom Months: June to July USDA Hardiness Zones: 4a to 9b

Evergreen sub-shrub with deep green leaves and rosy-purple flowers

Thymus 'Albiflorus' Thyme

Thymus 'Coccineus' Creeping Thyme

Thymus Highland Cream Thyme

Thymus 'Pseudolanuginosus' Woolly Thyme

Thymus 'Elfin' Thyme

Thymus 'Magic Carpet' Thyme

Thymus 'Pink Chintz' Thyme

Thymus English Thyme

Thymus praecox

'ALBIFLORUS' THYME

Height: 2 in. (5 cm) **Bloom Months: None** USDA Hardiness Zones: 4a to 9b

Low-growing habit with green leaves and white flowers.

'COCCINEUS' CREEPING THYME

Height: 2 to 4 in. (5 to 10 cm) **Bloom Months: None** USDA Hardiness Zones: 5a to 9b

TOP SELLER Low-growing perennial with small, elliptical green leaves and fuchsia-red blooms in Summer.

HIGHLAND CREAM

Height: 2 to 4 in. (5 to 10 cm) Bloom Months: None USDA Hardiness Zones: 3a to 8b 'Hartington Silver'

Also known as 'Hartington Silver'. Small green leaves with creamy white margins and tiny flowers of palest pink in late Spring.

'PSEUDOLANUGINOSUS' WOOLLY THYME

Height: 2 to 4 in. (5 to 10 cm) **Bloom Months:** None USDA Hardiness Zones: 5a to 9b

TOP SELLER Woolly creeper with gray foliage and white flowers; good for dry locations.

THYMUS 🧡 (THYME)

Thymus serpyllum

'ELFIN' THYME

Height: 1 in. (3 cm) Bloom Months: None USDA Hardiness Zones: 4a to 9b

Tight, creeping groundcover with mats of tiny, dark green foliage and pink flowers in Summer.

'MAGIC CARPET' THYME

Height: 2 in. (5 cm) Bloom Months: None USDA Hardiness Zones: 4a to 9b

Tiny pink flowers float over mats of green, slightly hairy foliage.

'PINK CHINTZ' THYME

Height: 1 in. (3 cm) **Bloom Months:** None USDA Hardiness Zones: 4a to 9b

Mat-forming creeper with tiny green leaves and pink flowers.

THYMUS 🜕 (THYME)

Thymus vulgaris

ENGLISH THYME

Height: 6 to 8 in. (15 to 20 cm) **Bloom Months: None** USDA Hardiness Zones: 4a to 9b

TOP SELLER Popular culinary variety has rounded leaves, purple-pink flowers and a semicreeping habit.

FRENCH THYME

Height: 6 to 8 in. (15 to 20 cm) **Bloom Months: None** USDA Hardiness Zones: 4a to 9b

Purple to white flowers with narrow, fragrant green leaves.

Thymus French Thyme

Thymus 'Doone Valley' Creeping Thyme

Thymus Golden Lemon Thyme

Thymus Lemon Thyme

Thymus Orange Thyme

Thymus Silver Edged Thyme

Thymus 'Silver King' Thyme

Thymus 'Spicy Orange' Thyme

Thymus 'Variegatus' Thyme

Verbena 'Lollipop'

THYMUS (THYME)

Thymus x citriodorus

'DOONE VALLEY' CREEPING THYME

Height: 1 to 2 in. (3 to 5 cm) Bloom Months: June to July USDA Hardiness Zones: 5a to 5b

Also known as Creeping Lemon Thyme. Purple flowers with lemon-scented, green and golden variegated foliage. Excellent for planting between stepping stones and rock gardens.

GOLDEN LEMON THYME

Height: 4 in. (10 cm) **Bloom Months:** None **USDA Hardiness Zones:** 6a to 9b

Pungently lemon-scented leaves are golden and variegated when grown in bright light.

LEMON THYME

Height: 8 in. (20 cm) **Bloom Months:** None **USDA Hardiness Zones:** 5a to 9b

Lemon-scented green leaves and lavender-pink flowers.

ORANGE THYME

Height: 12 in. (30 cm) **Bloom Months:** None **USDA Hardiness Zones:** 5a to 9b

Orange or citrus-scented green leaves and lavender-pink flowers.

SILVER EDGED THYME

Height: 4 in. (10 cm) Bloom Months: None USDA Hardiness Zones: 4a to 9b

Narrow green leaves with variable silver variegation, lavender-pink flowers and no lemon fragrance.

'SILVER KING' THYME

Height: 4 to 5 in. (10 to 13 cm) Bloom Months: None USDA Hardiness Zones: 7a to 9b

Lemon-scented, medium-green leaves are splashed with cream.

'SPICY ORANGE' THYME

Height: 2 to 4 in. (5 to 10 cm) **Bloom Months:** None **USDA Hardiness Zones:** 5a to 9b

Needle-like leaves with a spicy orange scent; soft lavender flowers in late Spring.

'VARIEGATUS' THYME

Height: 4 in. (10 cm) **Bloom Months:** None **USDA Hardiness Zones:** 5a to 9b

Lemon-scented green leaves with a thin, white-splashed margin and purple flowers.

VERBENA O (VERVAIN)

Verbena bonariensis

'LOLLIPOP'

Height: 24 in. (61 cm) Bloom Months: May to frost USDA Hardiness Zones: 7a to 11

Tender perennial has unique dwarf form with lavender-blue flowers.

VERBENA (VERVAIN)

Verbena canadensis

'HOMESTEAD PURPLE'

Height: 6 to 10 in. (15 to 25 cm) **Bloom Months:** May to frost **USDA Hardiness Zones:** 6a to 9b

Small, deep purple flowers on vigorous, mounded plants.

Verbena 'Homestead Purple'

MOODY BLUES® SERIES

DARWIN PERENNIALS

Height: 12 to 14 in. (30 to 36 cm) **Bloom Months:** June to October **USDA Hardiness Zones:** 4a to 9b

Compact series of first-yearflowering Veronica.

- Excellent 1-gallon production with great uniformity and habit.
- Continues to cycle and bloom all season until first frost.
- Compact, tidy habit is great for any garden or mixed container.
- No vernalization is required.

Noted for superior performance by Colorado State University trial in 2015

TOP SELLER Dark Blue

'Novaverblu' PP26,602 **Mauve** 'Novavermau' PP26,621

Pink 'Novaverpin' PP25,748 Sky Blue 'Novaversky' PP27,835 White 'Novaverwhi'

VERONICA (SPEEDWELL)

Veronica longifolia

'PERFECTLY PICASSO'

WALTERS GARDENS

Height: 22 to 26 in. (56 to 66 cm) **Bloom Months:** Summer **USDA Hardiness Zones:** 4a to 9b

Paintbrush-like spikes produce white buds that open to medium pink flowers, creating a bicolor look. Attractive flowers cover the top half of the plant, showing off its healthy medium green leaves on a beautifully rounded habit.

'ROYAL REMBRANDT'

WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm) **Bloom Months:** Summer **USDA Hardiness Zones:** 4a to 9b

Discover your new Speedwell staple! Violet-purple flowers cover the top half of the plant, showcasing its dark green foliage. A remontant variety; sheering will encourage reblooming later in the season.

'VERY VAN GOGH'

WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm) **Bloom Months:** Summer **USDA Hardiness Zones:** 4a to 8b PP27,428

A posh perennial with a unique color palette. Paintbrush-like, rosy purple flowers appear on well-branched scapes. Many secondary spikes extend the bloom time. Bright green, upright clumping foliage.

'BLUE SKYWALKER'

WALTERS GARDENS

Height: 28 to 30 in. (71 to 76 cm) Bloom Months: Summer USDA Hardiness Zones: 4a to 9b

This taller perennial provides height in the garden without too much horizontal space. Lavenderbue flower spikes cover the top half of an incredibly upright, dense habit of dark green leaves.

Veronica Moody Blues Sky Blue

Veronica First Glory

FIRST GLORY

RENE VAN GAALEN, B.V.

Height: 16 to 22 in. (41 to 56 cm) **Bloom Months:** Late Spring to

USDA Hardiness Zones: 4a to 8b 'Alllord' PP23,294

- · Compact, highly uniform plants.
- Short, thick spikes of deep blue flowers.
- · Vernalization not required.

FIRST KISS

RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) **Bloom Months:** Late Spring to Summer

USDA Hardiness Zones: 4a to 9b 'Allkiss' PP28,797

- · Pretty pink addition to the First collection.
- · Long flowering.
- · Vernalization not required.

Veronica First Kiss

FIRST LADY

RENE VAN GAALEN, B.V.

Height: 16 to 22 in. (41 to 56 cm) Bloom Months: Late Spring to

USDA Hardiness Zones: 4a to 8b 'Alllady' PP23,271

- · Compact plant habit.
- · Sturdy, white flower spikes.
- · Vernalization not required.

FIRST LOVE

RENE VAN GAALEN, B.V.

Height: 22 in. (56 cm) Bloom Months: Late Spring to

USDA Hardiness Zones: 4a to 9b 'Alllove' PP21,478

- · Uniform, short spikes of brilliant pink flowers.
- · Short and well-branched plants.
- · Excellent flower canopy without vernalization.

FIRST MATCH RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) **Bloom Months:** Late Spring to

USDA Hardiness Zones: 4a to 9b 'Allvglove' PP28,798

- Attractive dark pink addition to the First collection.
- · Long flowering.
- · Vernalization not required.

FIRST MEMORY

RENE VAN GAALEN, B.V.

Height: 22 to 24 in. (56 to 61 cm) Bloom Months: Late Spring to

USDA Hardiness Zones: 4a to 9b 'Allv1461' PPAF

- · Nice, soft blue addition to the First collection.
- · Long flowering
- · Vernalization not required.

Veronica First Match

Veronica First Memory

Veronica 'Forever Blue'

VERONICA (SPEEDWELL) Veronica longifolia

'FOREVER BLUE'

NEW FOR 2019 DARWIN PERENNIALS

Height: 16 to 18 in. (41 to 46 cm) Bloom Months: June to October USDA Hardiness Zones: 5a to 9a

No seed set for longer blooming.

- Striking Veronica produces continuous, deep blue flowers throughout Summer to Fall.
- Excellent branching.
- · Rich, deep blue color.
- Mildew resistant.
- · Larger than Moody Blues.

'LAVENDER LIGHTSABER'

NEW FOR 2019

WALTERS GARDENS

Height: 28 to 30 in. (71 to 76 cm) **Bloom Months: Summer** USDA Hardiness Zones: 4a to 9b

A tall, columnar-shaped habit holds soft-lavender flowers.

'MONA LISA SMILE'

NEW FOR 2019

WALTERS GARDENS

Height: 22 to 24 in. (56 to 61 cm) **Bloom Months:** Summer USDA Hardiness Zones: 4a to 9b PPAF

Produces long, paintbrush-like spikes of rosy-purple flowers on a terrific, rounded habit.

Veronica 'Mona Lisa Smile'

VERONICA ((SPEEDWELL)

Veronica austriaca

VENICE BLUE

DARWIN PERENNIALS

Height: 10 to 12 in. (25 to 30 cm) Bloom Months: March to April USDA Hardiness Zones: 4a to 9b 'Florverblue' PP27.555

- · Easy-to-grow variety makes an excellent season extender!
- · Requires less vernalization than other austriaca types.
- · Strong, upright stems for outstanding show at retail and in the garden.
- Early Spring-flowering variety loves heat.

VERONICA ((SPEEDWELL)

Veronica peduncularis

'GEORGIA BLUE'

Height: 8 in. (20 cm) Bloom Months: March to April USDA Hardiness Zones: 5a to 8b

Dense, gray-green, low-growing foliage has taller flowering stems covered with intense blue flowers.

Veronica Venice Blue

'WATERPERRY BLUE'

Height: 4 to 6 in. (10 to 15 cm) Bloom Months: June to September USDA Hardiness Zones: 3a to 8b

Spreading habit with light blue flowers and purple Winter foliage.

'WHITEWATER'

CHICAGOLAND GROWS, INC.

Height: 4 to 6 in. (10 to 15 cm) **Bloom Months:** June to September USDA Hardiness Zones: 4a to 8b PP22.783

Sport of 'Waterperry Blue' that produces bright white flowers on burgundy-green foliage.

VERONICA ((CREEPING SPEEDWELL)

Veronica repens

'SUNSHINE'

Height: 1 to 4 in. (3 to 10 cm) Bloom Months: June to July USDA Hardiness Zones: 4a to 8b

Groundcover type, creeping with white blooms on gold foliage.

'GILES VAN HEES'

Height: 4 to 6 in. (10 to 15 cm) Bloom Months: June to August USDA Hardiness Zones: 4a to 8b

Dwarf form with dark green foliage and short, bright pink flower spikes.

'RED FOX'

Height: 12 in. (30 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Produces rose-red spikes in Summer.

ROYAL CANDLES

PLANTHAVEN, INC.

Height: 15 to 18 in. (38 to 46 cm) Bloom Months: June to August USDA Hardiness Zones: 4a to 8b 'Glory' PP18.932

Long-blooming, dwarf variety with solid, conical spikes of bright violet-blue flowers.

'SUNNY BORDER BLUE'

Height: 18 to 24 in. (46 to 61 cm) Bloom Months: June to August USDA Hardiness Zones: 4a to 8b

Long display of vivid blue flower spikes atop dark green leaves.

VERONICA (SPEEDWELL) Veronica x hybrida

'PURPLEICIOUS'

DARWIN PERENNIALS

Height: 16 to 20 in. (41 to 51 cm) **Bloom Months:** June to August **USDA Hardiness Zones:** 5a to 8b PP17,639

- Long-blooming variety with intense purple flowers and dark green foliage.
- Well-branched plants have a strong, tidy habit.
- Very healthy, disease-free cultivar.

'BOWLES CUNNINGHAM'

Height: 5 to 8 in. (13 to 20 cm) **Bloom Months:** April to May **USDA Hardiness Zones:** 3a to 9b

Also known as 'Bowles'. Vigorous, spreading variety has thick, glossy leaves and sky blue flowers that are darker than standard *V. minor.*

'ILLUMINATION'

PLANTHAVEN, INC.

Height: 4 in. (10 cm) **Bloom Months:** April to May **USDA Hardiness Zones:** 4a to 9b PP12,132

Popular, low-growing, evergreen groundcover has variegated foliage and small, light lavenderblue flowers in Spring.

Vinca 'Illumination

Viola 'Halo Golden Yellow'

Bloom Months: February to April, September to October
USDA Hardiness Zones: 5a to 9b

Excellent hardiness for long-lasting garden enjoyment.

• Very heat-tolerant.

• No vernalization required.

• Oversummers and overwinters.

• Larger flowers than Celestial.

NEW 'Halo Golden Yellow' An excellent rich, golden-yellow color addition to the series. PPAF 'Halo Lemon Frost' Extra-large, two-toned flowers captivate customers for early sales. PP26,383 'Halo Lilac' PP24,542; CPBR4837 'Halo Sky Blue' PP24,541; CPBR4838 'Halo Violet' PP24,428; CPBR4839

GROWER RESOURCES & FINISHING TRIALS

TOOLS FOR GROWING & SHIPPING BEST-QUALITY PLANTS

We are working to provide a quality product from start to finish – and offer solutions for your growing challenges. Resources like our finished culture research program at our facility in West Grove, PA, provide detailed schedules and finishing protocols for many of our Darwin Perennials. These schedules and trialing protocols help you bring thriving plants to retail - when you want them.

TRIALING PROGRAM GOALS

- Learn how Darwin Perennials varieties perform with varying transplant dates.
- Develop production protocols that will help growers deliver quality finished perennials to retailers, wholesalers and landscapers.
- Learn how we can use Darwin Perennials varieties to increase shoulder business sales.

TRIALS

- Includes 60+ varieties of Darwin Perennials plants.
- Added more than a dozen varieties to our trials this year.
- Also added a 4th flowering trial for Labor Day and beyond.

ADVANTAGES

- Learn how your growers can turn production space with Darwin Perennials varieties. This creates increased revenue and profit without investing in new production space.
- Retailers increase color diversity to consumers.
- · Landscapers offer fresh color Spring, Summer and Fall.

Visit www.darwinperennials.com/Culture for a full, current listing and photos of all trialed varieties. You will also find compiled data from previous trials, additional culture and grower support information, as well as downloadable, easy-to-use scheduling tools.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Low to moderate	50-75 ppm N	Not necessary, remove premature flowers.	28-35 days after sticking	Do not over-mist.
Low to moderate	50-75 ppm N	Not necessary, remove premature flowers.	28-35 days after sticking	Do not over-mist.
Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Stick cuttings the day of arrival, if possible.
Low	50-75 ppm N	Recommended.	35-42 days after sticking	This alyssum requires light mist and soil moisture. Can be rooted under a dome or tent. Do not over-mist.
Low	100 ppm N starting at Day 7	Not necessary.	42-45 days after sticking	Quite easy to propagate. Do not over-mist. Remove from mist after 10 to 12 days. Allow media to dry slightly between irrigations to encourage root development.
Low to moderate	50-75 ppm N	Not necessary in liner stage.	35-42 days after sticking	Discontinue mist as quickly as possible once rooting occurs.
Moderate	50-75 ppm N	Pinch once in the liner stage.	28-35 days after sticking	Begin fertilizing 7 days after stick. Avoid over-misting.
Moderate	50-75 ppm N	Pinch once in the liner stage.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Moderate	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Very low	50 ppm N starting at Day 7	Pinch to remove any flower buds.	42-49 days after sticking	Dianthus require very low mist settings to root. Over- misting will result in slow rooting and high losses in propagation.
Low to moderate	50-75 ppm N	Not typical in propagation.	42-49 days after sticking	Foxlight Digitalis root slowly with first roots showing 15 to 18 days after stick. However, it is best to discontinue mist prior to visible root, as they root more quickly when not over-misted and when media is allowed to dry slightly between waterings.
Low	Begin feeding 50-75 ppm 10 days after sticking	Pinch 21-25 days after sticking.	42-49 days after sticking	Don't oversaturate media. Low mist levels work best.
High for first few days, then reduce to moderate	50-100 ppm N	Recommended.	42-49 days after sticking

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Low	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	75-100 ppm N when roots become visible; increase to 150-200 ppm N as roots develop	Yes, 7 days before transplanting.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Moderate	50-75 ppm N	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70'F (21'C). Remove flowers in propagation.	42-49 days after sticking	Pinch once in the liner stage.
Low	Feed at 100 ppm N after 9 days	Pinch once shoots elongate for best branching.	35-42 days after sticking	Typically remove from propagation area after two weeks. Don't keep rooting media excessively wet. Use long-day lighting when propagating when day length is less than 12 hours.
Low	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation. Long day obligate plant. Must provide long days in propagation.
Low to moderate	50-75 ppm N after 14 days	Not necessary.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation. Cuttings typically arrive with flowers already induced due to cool night temperatures in Colombia. Non-induced cuttings require 6 weeks of night temperatures below 55°F (13°C) to flower.
Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	100 ppm N starting at Day 10	Yes, pinch after 4 weeks. Can be double pinched in the liner stage for even greater branching.	42-49 days after sticking depending on number of pinches	Iberis benefit from a basal IBA dip prior to sticking. Do not over-mist or high losses can occur.
Low; prefers high humidity to mist	50-75 ppm N	Recommended.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low; prefers high humidity to mist	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low	50-75 ppm N	Not typically necessary.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
Low to moderate	75-100 ppm N starting at Day 7	Pinch while young plants are soft and actively growing.	35-42 days after sticking	Pinch any premature buds as they become visible.

MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
Moderate	50-75 ppm N	Recommended.	28-35 days after sticking	Do not over-saturate rooting media. Use long-day lighting when day length is less than 12 hours to keep plants
				actively growing.
Moderate	50-75 ppm N	Recommended.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Low to moderate	50-75 ppm N when roots become visible	Recommended	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media.
Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate to high for first 24 hours, then reduce to low	50-75 ppm N after 10 days	Recommended.	35-42 days after sticking	Do not over-saturate rooting media. Allow media to dry moderately starting 10 days after sticking to encourage root development.
Low to moderate	75-100 ppm N starting at Day 7	Yes, while young plants are soft and actively growing.	42-49 days after sticking	Plants grow more actively under long days. Use 13-hour extended day lighting for Winter propagation.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt. Begin feeding 7 days after sticking with 50-75 ppm N.
Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt.
Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt. Begin feeding 7 days after sticking with 50-75 ppm N.
Low	50-75 ppm starting at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Over-misting and saturated propagation media will dramatically delay rooting and increase rooting losses. Discontinue mist as quickly as possible and only mist to avoid leaf wilt.

31	COREOPSIS Coreopsis verticillata	Sylvester	5.8-6.2	Days: 55 to 80°F (13 to 27°C)	Long day obligate	No	5,000 to 8,000	Allow media to dry evenly between watering.		
1	DIANTHUS Dianthus hybrida	Mountain Frost™ Pink Carpet, Pink PomPom, Pink Twinkle	5.8-6.2	45-60°F (7-16°C)	Day length neutral	Beneficial for an increased quantity of Spring blooms.	3,000 to 5,000	Low to moderate	Use a balanced fertilizer at a rate of 125 to 150 ppm N.	
1	DIANTHUS Dianthus hybrida	Mountain Frost™ Rose Bouquet	5.8-6.2	45-60°F (7-16°C)	Day length neutral	Beneficial for an increased quantity of Spring blooms.	3,000 to 5,000	Low to moderate	Use a balanced fertilizer at a rate of 125 to 150 ppm N.	
1	DIANTHUS Dianthus hybrida	Mountain Frost™ Silver Strike	5.8-6.2	45-60°F (7-16°C)	Day length neutral	Beneficial for an increased quantity of Spring blooms.	3,000 to 5,000	Low to moderate	Use a balanced fertilizer at a rate of 125 to 150 ppm N.	
1	DIANTHUS Dianthus hybrida	Mountain Frost™ White Twinkle	5.8-6.2	45-60°F (7-16°C)	Day length neutral	Beneficial for an increased quantity of Spring blooms.	3,000 to 5,000	Low to moderate	Use a balanced fertilizer at a rate of 125 to 150 ppm N.	
33	DIGITALIS Digitalis hybrida	Foxlight™ Series	5.8-6.2	Nights: 55 to 60°F (13 to 16°C) Days: 60 to 65°F (16 to 18°C)	Long day facultative	Beneficial; needed for early flowering. Not needed for Summer flowering.	3,000 to 5,000	Allow media to dry moderately between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
4-5	ECHINACEA Echinacea x hybrida	Double Scoop™	5.8-6.2	Nights: 55 to 60°F (13 to 16°C) Days: 60 to 65°F (16 to 18°C)	Long day obligate	No	3,500 to 5,000	Allow media to dry moderately between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
2-3	ECHINACEA Echinacea x hybrida	Sombrero®	5.8-6.2	60 to 68°F (16 to 20°C)	Long day obligate	No	5,000 to 8,000	Moderate	Use a balanced fertilizer at a rate of 150 to 175 ppm N.	
34	ERYSIMUM <i>Erysimum linifolium</i>	Bowles Me Away	5.8-6.2	50 to 60°F (10 to 16°C)	Day length neutral	No	3,000 to 5,000	Low to moderate	150 to 175 ppm N.	
35	ERYSIMUM Erysimum linifolium	Cheers™ Series	5.8-6.2	50 to 60°F (10 to 16°C)	Day length neutral	No	3,000 to 5,000	Low to moderate	150 to 175 ppm N.	
36	EUPATORIUM Eupatorium dubium	Little Joe	5.8-6.2	Nights: 55 to 65°F (13 to 18°C) Days: 65 to 75°F (18 to 24°C)	Long day obligate	No	5,000 to 8,000	Allow media to dry moderately between watering. Prefers moist soils.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
37	EUPHORBIA Euphorbia amygdaloides	Red Velvet	5.6-6.5	Nights: 50 to 55°F (10 to 13°C) Days: 55 to 60°F (13 to 16°C)	Short day obligate	Beneficial; aids bulking.	3,000 to 5,000	Allow media to dry regularly between watering.	Use a balanced fertilizer at a rate of 100 to 125 ppm.	
39, 41	GAURA Gaura lindheimeri	Ballerina™, Belleza®	5.8-6.2	Nights: 56 to 61°F (13 to 16°C) Days: 71 to 76°F (21 to 24°C)	Day length neutral	No	5,000 to 9,000	Allow media to dry slightly between watering.

PERENNIALS WITH STAYING POWER™ To order, please see back cover. REGIONAL TOP PICKS

DARWIN PERENNIALS **ESSENTIAL CULTURE GUIDE**

UPON RECEIPT

Unrooted perennials should be stuck as quickly as possible. Tender cuttings such as Artemisia, Agastache, Lavandula, Perovskia and Salvia should be immediate priority. Cuttings that cannot be stuck immediately should be maintained in a cooler at 40 to 45°F (4 to 7°C). Refer to the Propagation Guide for crop-specific suggestions. Generally speaking, herbaceous perennials benefit from a basal stem dip of IBA rooting hormone to speed up the rooting process. Be careful with misting levels. Perennials suffer from receiving too much mist more often than from too little mist.

Rooted perennials should be unpacked and inspected for active root growth. It is often preferable to place recently received perennial liners on a bench or the ground for a few days to help them overcome transport stress. This is particularly important for liners that have been shipped in boxes. Water on arrival and look for new root activity prior to transplant, if possible.

AT TRANSPLANT

Well-rooted and toned perennial liners are able to withstand transplant stress very well. Critical to success, provide newly transplanted perennials with immediate irrigation. Watering at the end of the transplant line rather than after you've filled a bed greatly improves uniformity of new root establishment. In any case, do not allow media surface to dry after transplant for the first several days until new roots are extending into the media. Perennials do not like to be planted too deep. Generally speaking, perennial liners should be planted level with the soil surface.

Use a well-drained media containing properly composted bark. These types of perennial soil media are readily available. It is important that the media incorporates a surfactant to help ensure proper wetting and re-wetting of the media. The media should be stabilized to a pH of 5.8 to 6.2 and an EC of 1 to 1.2 using the Saturated Media Extract (SME) method.

FERTILIZATION

Perennials can be fed using liquid fertilizers on a periodic or constant feed basis. Liquid fertilizer rates can be found in the Perennial Finishing Guide. Use a balanced formula that complements the pH and alkalinity of your irrigation water. Liquid fertilizing offers advantages of greater flexibility and control over fertility levels, but can be difficult to administer economically when overhead irrigation is used. In the case of overhead irrigation, controlled release fertilizers (CRF) are preferable. Incorporate CRF into the media prior to planting based on manufacturer's recommendations or top-dress after planting.

SPACING

Spring-planted perennials should be spaced to finished spacing after transplant. This allows better growing conditions and helps to avoid overcrowding and stretch. The added airflow will help reduce foliar diseases and allow for better insect control.

Fall-planted perennials can be spaced at transplant in temperate climates or placed pot-tight in climates where temperatures cause containers to freeze. In either case, proper spacing for the anticipated finished size of the plant will dramatically improve plant quality and reduce labor.

INSECTS AND DISEASES

Incoming perennial liners or cuttings should be inspected for pests and diseases. Apply appropriate treatments as needed.

After transplant, regular scouting and careful observation is critical to maintaining a healthy crop. The practice of integrated pest management (IPM) will reduce losses and pesticide costs by identifying and correcting problems before they escalate. If a pesticide treatment is necessary, please refer to the manufacturer's label regarding proper usage. It is always a good practice to test new varieties for phytotoxicity when making pesticide applications.

VERNALIZATION AND BULKING

A number of perennial species require a period of cold temperature exposure to flower. The length of time varies from just a few weeks below 50°F (10°C) to as much as 10 weeks below 40°F (4°C). Generally speaking, early Spring-flowering perennials like *Phlox subulata*, Iberis and Alyssum require a cold period to flower. Many perennials such as Salvia nemorosa, Monarda and Phlox paniculata do not require vernalization to flower, but do benefit from a cold, short day bulking period. In these cases, Summer or Fall planting increases root and crown mass and the corresponding flowering shoots on the plants. It has also been shown to hasten flowering in many species by up to four weeks.

OVERWINTERING

The keys to success when overwintering perennials are:

- · Avoid standing water
- · Provide adequate air circulation
- · Use preventative disease treatments
- · Remove dead leaf/tissue
- · Utilize rodent control
- · Low media EC when entering dormancy
- Avoid freeze and thaw cycles

The overwintering area, whether in a field or hoop-house, should be sloped so that rain or other water sources cannot accumulate. In climates where Winter conditions freeze and thaw, cover prior to freeze and uncover as soon as possible. Where temperatures remain below freezing, cover after first freeze and maintain the cover until late Winter or early Spring when weather moderates. Remove dead and abscising leaves from herbaceous perennials like Hosta, Monarda, Heliopsis and dormant Hemerocallis. Apply a broad spectrum fungicide prior to covering or closing hoop houses to reduce disease pressure.

Once weather conditions moderate, be sure to scout for insect and disease problems and respond accordingly. Also, check pH and EC levels in the media. Perennials that emerge from dormancy will begin to grow rapidly, and the lack of adequate nutrition will lead to reduced branching, lower leaf loss and smaller flowers.

TERMS & CONDITIONS OF SALE

NOTE: DARWIN PERENNIALS IS A DIVISION OF BALL HORTICULTURAL COMPANY (BALL). DARWIN PERENNIALS **TERMS & CONDITIONS** OF SALE ARE COUNTRY/ REGION SPECIFIC. VISIT DARWINPERENNIALS.COM FOR CURRENT TERMS & CONDITIONS. THE FOLLOWING TERMS & CONDITIONS OF SALE APPLY TO UNROOTED CUTTINGS OR ROOTED LINERS SOLD BY BALL WITHIN THE UNITED STATES AND CANADA

ACCEPTANCE OF TERMS

These terms and conditions shall govern orders for plants, supplies and other materials (merchandise) placed with Seller. All negotiations with sales representatives or other agents of Seller are merged herein. No modification of these terms and conditions shall be effective unless in writing signed by Seller. Placement of the order shall constitute Purchaser's acceptance of these terms and conditions. All orders are subject to acceptance by Seller at our offices in West Chicago, Illinois.

LIMITATION OF WARRANTY

Seller warrants, to the extent required by law that merchandise conforms to the description appearing in Seller's catalog and on container labels, within recognized tolerances SELLER MAKES NO OTHER OR FURTHER WARRANTY, EXPRESS OR IMPLIED. ALL OTHER OR **FURTHER WARRANTIES** INCLUDING ANY WARRANTIES OF MERCHANTABILITY, TITLE, NON-INFRINGEMENT, AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. Certain merchandise may be separately warranted by the manufacturer. Seller does not adopt or ratify any manufacturer warranties, express or implied, and Seller shall have no liability thereunder. Seller does not adopt or ratify any manufacturer warranties, express or implied, made by Purchaser upon resale of the merchandise, and Seller shall have no liability thereunder.

LIMITATION OF REMEDY

PURCHASER'S SOLE AND EXCLUSIVE REMEDY SHALL BE REFUND OF THE PURCHASE PRICE. SELLER'S LIABILITY, WHETHER FOR BREACH OF CONTRACT, BREACH OF WARRANTY, NEGLIGENCE, PRODUCTS LIABILITY OR ANY OTHER THEORY OF LIABILITY, IS LIMITED TO THE AMOUNT OF THE PURCHASE PRICE UNDER NO CIRCUMSTANCES SHALL SELLER BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE, OR FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

MANDATORY ARBITRATION

ANY CLAIM WHICH PURCHASER MAY HAVE AGAINST SELLER ARISING OUT OF OR RELATING TO THE SALE OF THE MERCHANDISE SHALL BE SETTLED BY BINDING ARBITRATION IN ACCORDANCE WITH THE COMMERCIAL ARBITRATION RULES OF THE AMERICAN ARBITRATION ASSOCIATION, SAID ARBITRATION TO BE VENUED IN COOK OR DUPAGE COUNTIES, ILLINOIS.

GOVERNING LAW, JURISDICTION & VENUE

The laws of the State of Illinois, including but not limited to the Uniform Commercial Code as adopted therein, shall govern all matters arising out of or relating to Seller's sale of merchandise. ANY DISPUTE NOT SUBJECT TO ARBITRATION AND ANY ACTION TO ENFORCE AN ARBITRATION AWARD ARISING OUT OF OR RELATING TO THE SALE OF MERCHANDISE HEREUNDER SHALL BE MAINTAINED IN THE STATE OR FEDERAL COURTS LOCATED IN DUPAGE OR COOK COUNTIES, ILLINOIS, AND PURCHASER SUBMITS TO THE JURISDICTION OF AND VENUE IN SAID COURTS.

INDEMNITY

By accepting merchandise, Purchaser agrees to defend Seller, to hold it harmless and indemnify it from and against any claim or loss asserted by any or all transferees of such merchandise or users of the products of such merchandise who are not notified by Purchaser in writing of Limitation of Warranty, Limitation of Remedy, Mandatory Arbitration, Governing Law Jurisdiction and Venue in language substantially equivalent to that contained in these Terms and Conditions of Sale.

PRICES

All prices are subject to change without notice. The price in effect at time of shipment will prevail. Prices do not include installation; Seller takes no responsibility, and shall have no liability for installation. Additional processing and handling charges may be added.

PAYMENT

Payment is due in invoiced currency and in accordance with the terms specified on invoice. In the event of default in the payment of any amount when due, and in addition to all other rights and remedies available to Seller. SELLER SHALL BE ENTITLED TO COLLECT A LATE CHARGE OF 2% PER MONTH (24% PER YEAR) OR THE MAXIMUM RATE ALLOWED BY LAW. WHICHEVER IS LESS ON ALL AMOUNTS PAST DUE FROM THE DATE DUE UNTIL THE DATE PAID. A FEE OF \$25.00 WILL BE CHARGED FOR ANY RETURNED CHECK DECLINED EFT TRANSACTION OR DECLINED BANKCARD TRANSACTION.

If paying by Pre-Authorized Debit (PAD), or EFT, please note you have waived your right to receive pre-notification of the amount of the PAD and agreed that you do not require advance notice of the amount of PADs before the debit is processed. You have certain recourse rights if any debit does not comply with these terms. For example, you have the right to receive a reimbursement for any PAD that is not authorized or is not consistent with this PAD agreement. To obtain more information on your recourse rights, contact your financial institution

FREIGHT & HANDLING CHARGES, INSPECTION, DAMAGED GOODS

The freight and handling charge on Purchaser's invoice covers shipment of the merchandise to Purchaser's destination, and replacement or credit for damaged merchandise if the steps listed here are followed. PURCHASER WILL NOT REFUSE OR RETURN GOODS, OR THE RIGHT TO FILE A CLAIM IS LOST AND PURCHASER WILL STILL BE LIABLE FOR THE MATERIAL AND THE FREIGHT. When Purchaser receives shipment: 1) Count all cartons, 2) Inspect all cartons for external damage. 3) Check for open or resealed cartons. 4) Note any damages, shortages, open or resealed cartons on the delivery receipt; the carrier's representative must also sign the receipt. 5) Open all boxes immediately and inspect for damage such as scorched, frozen or broken plants; material shortages; etc. NOTIFY SELLER

IMMEDIATELY IF A SHIPMENT IS DAMAGED. Call your sales representative to report the damage and receive details on what is needed to file a claim.

CANCELLATION POLICY

Cancellations for unrooted cuttings must be received at least thirty (30) days prior to scheduled ship date. Cancellations for liners must be received prior to stick or sow date

NOTICE & RETURN

Seller shall have no liability for any defect unless notice is given promptly, not to exceed thirty (30) days after such defect is or should have been discovered. No merchandise may be returned without Seller's prior written authorization.

DELAYS, SHORTAGES & SUBSTITUTIONS

Seller shall not be responsible for delays in delivery or for losses resulting from such delays. Seller reserves the right to make partial shipment. In the event of shortages, Seller may substitute such other, similar merchandise as is available.

PLANT PROTECTION

Varieties described herein may be covered by the Flowering-Only License Agreement, United States Plant Patents, Utility Patents, and/or Plant Breeders Rights. These varieties may not be reproduced without authorization. The breeder or authorized representative has the right to inspect customers' nurseries during normal business hours to assess compliance with the restrictions on use of protected varieties.

TRADEMARKS

® denotes a U.S. registered trademark and ™ denotes a trademark of Ball Horticultural Company, unless otherwise indicated.

SALES LIMITATIONS

THE COMPANY'S PRODUCTS MAY NOT BE SOLD, DIVERTED, TRANSFERRED OR RE-EXPORTED, DIRECTLY OR INDIRECTLY, TO ANY INDIVIDUAL, ENTITY, OR DESTINATION THAT IS SUBJECT TO UNITED STATES OR UNITED NATIONS SANCTIONS PROGRAMS OR EMBARGOS (INCLUDING BUT NOT LIMITED TO OFAC SANCTIONS PROGRAMS AND THOSE LISTED ON OFAC'S "SPECIALLY DESIGNATED NATIONALS" LIST) WITHOUT AN APPROPRIATE EXPORT LICENSE.

ALL SHIPMENTS MUST BE SHIPPED IN COMPLIANCE WITH THE FOREIGN CORRUPT PRACTICES ACT AND THE UK BRIBERY ACT.
