PERENNIALS WITH STAYING POWER™

DarwinPerennials®

2019 DARWIN PERENNIALS

DarwinPerennials®

STAYING POWER

Welcome to the 2019 Darwin Perennials catalog. The Darwin introductions included within were developed from years of breeding and searching the globe to find the best possible Perennials with Staying Power™. Our goal is to offer perennials with outstanding flowering and landscape performance that meet the needs of today's retail, landscape and nursery segments.

Inside, you will also find our extensive array of genetics available in multiple forms, including unrooted production from our farm in Colombia, as well as tissue-culture-raised plugs, grasses and more. Our Colombian farm has reliably supplied the industry for more than 15 years. In addition, we have an exciting offering from leading breeders that feature Darwin Perennials genetics, including **Walters Gardens** and **Must Have Perennials®**, as well as all your favorite varieties. All of this makes Darwin Perennials a one-stop shop for all your perennial needs.

In this catalog, take a look at some of our breakthrough introductions like **Salvia 'Blue by You'**, a hardy hybrid Salvia with vibrant, long-lasting flowers that repeat blooms from Spring to Fall. Or, check out one of our new series, **Helenium Salud™**, which brings excellent Summer and Fall color to any retail operation or landscape. More notable introductions and breakthroughs in breeding include **Coreopsis 'Super Star'** with its large, 2.5-inch flowers, and **Echinacea Sombrero® Tres Amigos**, which displays three colors at once.

Be sure to note our expanded culture section, which includes schedules and trialing protocols as well as regional top picks. We've trialed over 60+ different Darwin Perennials genetics to provide growers with a roadmap for bringing fresh perennials into color from Spring to Fall.

Finally, for ordering information and more, turn to your Darwin Perennials team of experts and your preferred Distributor, who are all ready to serve you!

Sincerely,

Leland Toering

Sales and Marketing Manager

DARWIN FARM – COLOMBIA

FOCUSED ON RELIABILITY

Our focus is on ensuring a reliable supply of outstanding genetics from Darwin Colombia, our unrooted cutting production farm outside of Bogotá. Here are some of our investments and areas of concentration:

Clean Stock Program (to ensure healthy, disease-free products)

- Initiation and maintenance of entire assortment into on-site Tissue Culture Lab.

Production Planning (to ensure order fulfillment and inventory)

- Ability to trace all of our products forward and backward in the supply chain.
- Expanding and building new greenhouses to reliably meet your perennial needs for the future.

Post-Harvest Cold Chain (to ensure quality cuttings from harvest throughout entire process)

- Construction (completed in 2018) of a new, temperature-controlled cold room to maintain cold chain from harvest through shipment.
- Construction (completed in 2018) of a new packing area designed with lean flow efficiencies to maximize order-fill and packing accuracy.

Concentrating on reliability confirms our commitment to remain the leading supplier of perennial cuttings for the North American market.

MUST HAVE PERENNIALS®

TRIED & TRUSTED™

We continue to build on our relationship with Must Have Perennials, a brand that brings new, innovative perennials to the market. Darwin Perennials is the exclusive unrooted cutting supplier of their perennial program. We also offer more than 40 of these high-quality varieties that have been tested for years – in gardens and container trials – at secure trial sites, leading perennial growers, universities and botanic gardens throughout North America. These comprehensive trials establish reliability and provide valuable information on regional performance to ensure success for you and your customers.

Don't miss these best-performing varieties in this year's catalog:

LANDSCAPE PERFORMANCE!

Darwin Perennials varieties are trialed and selected for their proven success and longevity in the landscape. You can count on the best genetics, reliable supply and proven performance in every Darwin Perennials plant.

DarwinPerennials.®

Echinacea Sombrero Flamenco Orange, p. 3

Dianthus Mountain Frost Pink PomPom, p. 1

Dianthus Mountain Frost Pink Twinkle, p. 1

Echinacea Double Scoop Cranberry, p. 5

Echinacea Double Scoop Orangeberry, p. 5

Monarda Balmy Purple, p. 63

HERE IS A SAMPLING OF SOME OF OUR GO-TO VARIETIES FOR THE LANDSCAPE:

Dianthus Mountain Frost™ Series — **Pink PomPom** and **Pink Twinkle**, page 1

Echinacea Sombrero® Flamenco Orange, page 3

Echinacea Double Scoop™ **TOP SELLER** **Cranberry** and **TOP SELLER** **Orangeberry**, page 5

Lavender SuperBlue, page 54

TOP SELLER **Monarda Balmy™ Purple**, page 63

Nepeta Junior Walker™, page 64

Perovskia 'CrazyBlue', page 75

TOP SELLER **Salvia 'Blue Marvel'**, page 95

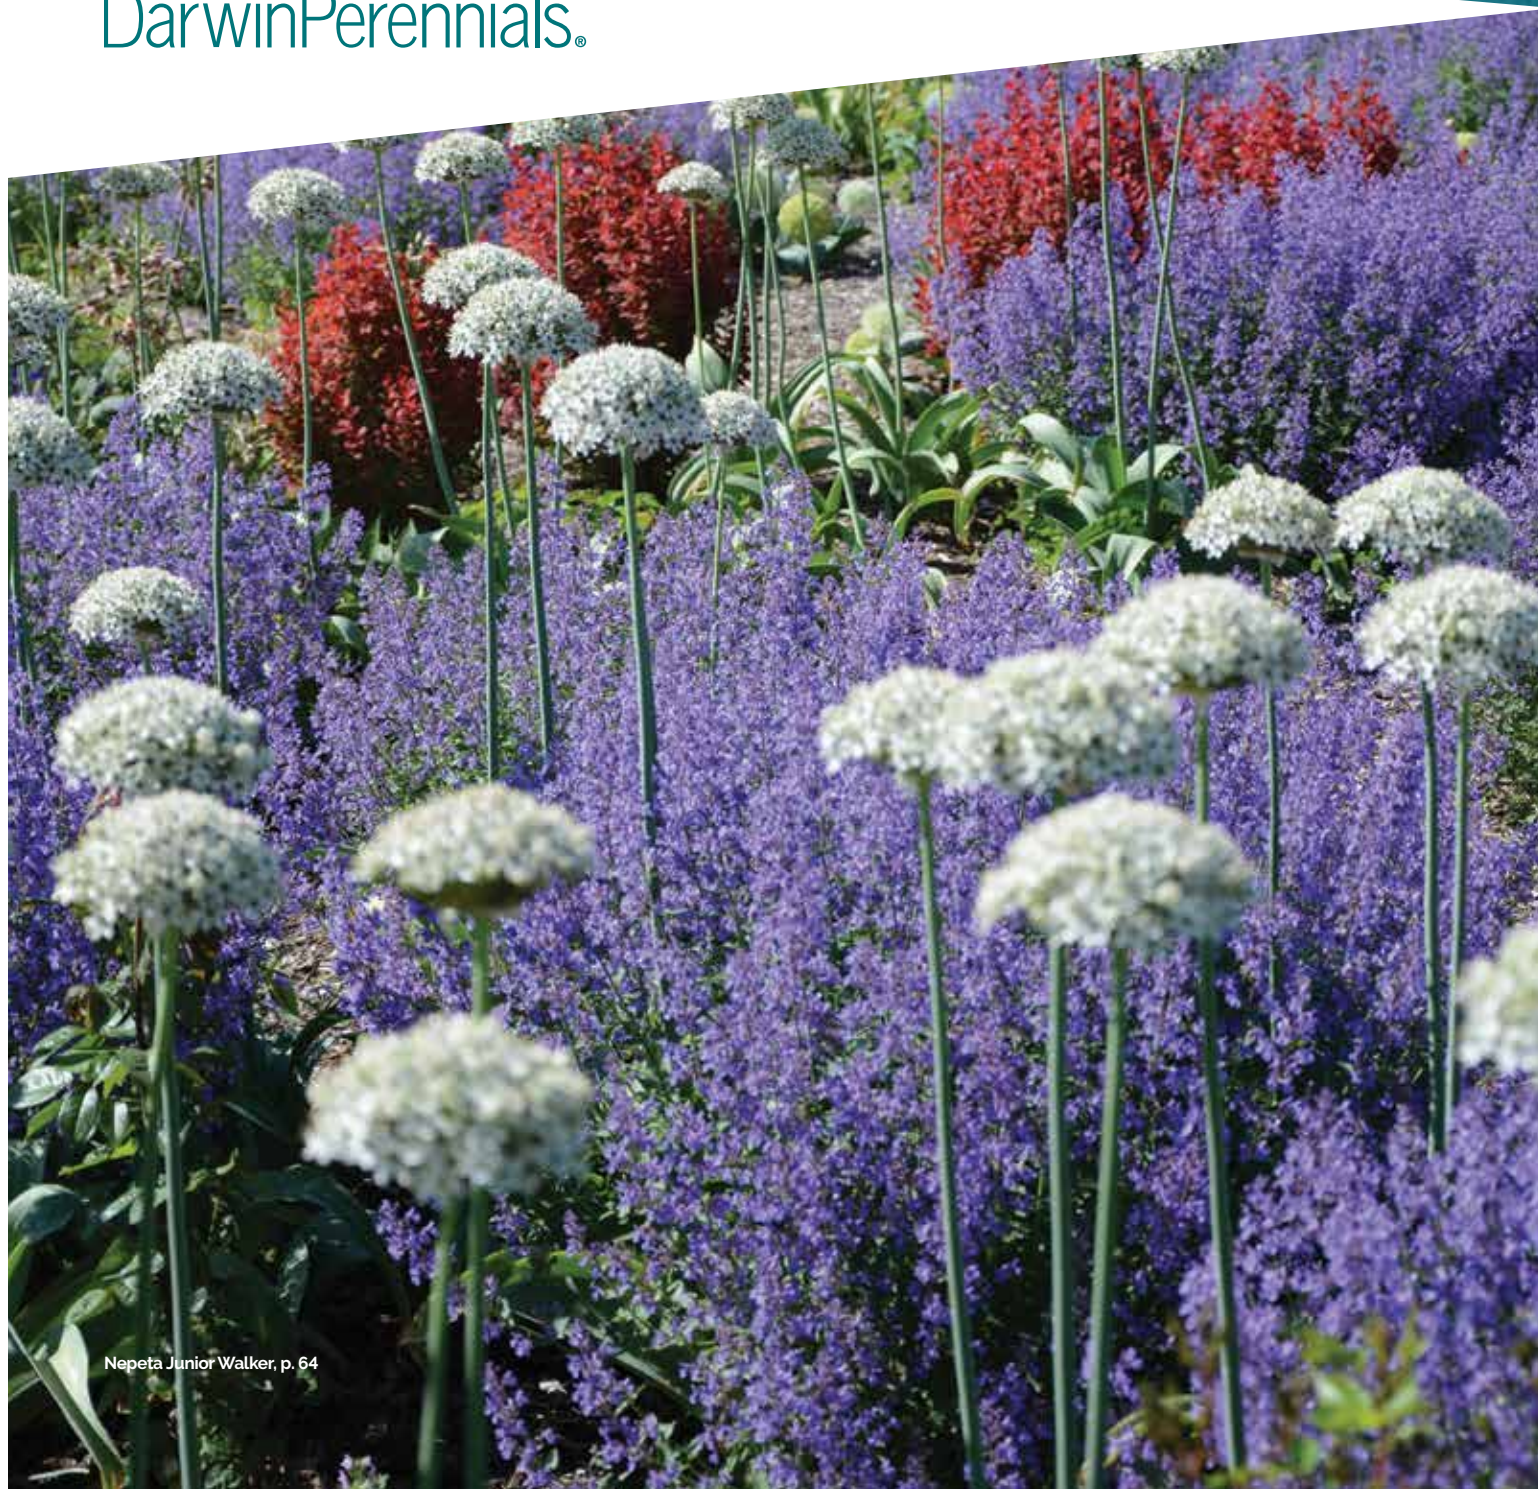

TOP SELLER **Salvia Lyrical™ Blues**, page 97

Veronica Moody Blues® Series, page 107

Darwin Perennials products are also bred to be well-behaved and manageable, requiring minimal maintenance. For example, Nepeta Junior Walker™ – a third the size of its popular parent, 'Walker's Low' – stays neat and tidy and doesn't require shearing. It was selected as a Colorado State top performer in 2012. Or, Perovskia 'CrazyBlue' offers interlacing branches which prevent breakage during heavy rainfall.

In addition, Darwin Perennials varieties bring exceptional color and interest to landscapes. Tough and reliable, they can be mixed and matched to deliver a variety of hues and textures throughout the season, along with excellent weather tolerance.

BANDWIDTH

DARWIN PERENNIALS

Height: 30 to 36 in. (76 to 91 cm)

Bloom Months: October to November

USDA Hardiness Zones: 5a to 9b

Available as a liner only
'NCMS2B' PPAF

Dwarf ornamental grass with banded foliage provides interest in the garden.

- Rust resistant and infertile, for healthy, non-invasive plants in the landscape.

"The new Miscanthus Bandwidth is infertile, so it won't reseed for the grower or the gardener, and its full, compact size is ideal for any yard or outdoor garden room. We placed a container of Bandwidth on a company patio this Summer, and it was a big hit here at Emerald Coast Growers. We love the bright green leaves with gold highlights. I want one of these on my balcony at home!"

Pamela Straub
Key Accounts and Customer Service Manager, Emerald Coast Growers, FL

PP22,255

Green and white variegated leaves with soft pink flower spikes.

'SILVER QUEEN'

Height: 6 in. (15 cm)
Bloom Months: May to June
USDA Hardiness Zones: 3a to 9b

Blue flower spikes over white and green variegated leaves.

AJUGA ●●●
(BUGLEWEED)
Ajuga x tenorii

CHOCOLATE CHIP

Height: 4 in. (10 cm)
Bloom Months: May to June
USDA Hardiness Zones: 3a to 9b
'Valfredda'

Dwarf form with narrow, chocolate-colored leaves and blue flowers.

'DIXIE CHIP'

ITSAUL PLANTS, INC.
Height: 3 in. (8 cm)
Bloom Months: May to June
USDA Hardiness Zones: 3a to 9b
PP20,890

Unique, multi-colored foliage with brilliant blue flowers; spreading habit.

GOLDEN SPRING

ALYSSUM ●

Alyssum wulfenianum

'GOLDEN SPRING'

DARWIN PERENNIALS

Height: 6 to 8 in. (15 to 20 cm)

Bloom Months: April to May

USDA Hardiness Zones: 4a to 9b

PP25,710; CPBR5491

Exciting season extender brings a fresh class of "WOW" to the early-Spring flowering group.

- The first vegetative Alyssum of this species, with the largest flowers of its class.
- Easy-to-grow, heat-loving, pest-free, hardy perennial.
- Evergreen foliage.

Alyssum 'Golden Spring'

Amsonia 'Blue Ice'

Artemisia 'Powis Castle'

Artemisia 'Silver Mound'

Artemisia French Tarragon

Artemisia 'Silver Brocade'

Aster 'Purple Dome'

AMSONIA ●●
(BLUE STAR)
Amsonia x hybrida

'BLUE ICE'

Height: 16 in. (41 cm)
Bloom Months: May to June
USDA Hardiness Zones: 4a to 9b

Starry blue blooms against narrow, bright green leaves that turn yellow in Fall.

ARTEMISIA ●
(WORMWOOD)
Artemisia arborescens

'POWIS CASTLE'

Height: 24 to 30 in. (61 to 76 cm)
Bloom Months: July
USDA Hardiness Zones: 5a to 9b

Features fine-textured, lacy silver foliage spikes that grow mounded and upright.

ARTEMISIA ●
(WORMWOOD)
Artemisia schmidtiana

'SILVER MOUND'

Height: 6 to 12 in. (15 to 30 cm)
Bloom Months: July
USDA Hardiness Zones: 3a to 8b

Compact, mounded plants have soft, silvery gray foliage and small yellow blooms.

ARTEMISIA ●
(WORMWOOD)
Artemisia stelleriana

'SILVER BROCADE'

Height: 8 to 10 in. (20 to 25 cm)
Bloom Months: July
USDA Hardiness Zones: 3a to 8b

Silvery foliage resembles Dusty Miller, outstanding for rock gardens and edging.

ARTEMISIA ●
(WORMWOOD)
Artemisia dracunculus sativa

FRENCH TARRAGON

Height: 36 in. (91 cm)

- Semi-double flowers on free-branching plants make a striking season extender.
- Compact habit lets growers ship more plants per rack.
- Intense yellow flowers and variegated foliage command attention.
- Long-flowering plants light up Spring and Summer gardens.

'BRESSINGHAM DOUBLOON'

MUST HAVE PERENNIALS®
Height: 48 to 60 in. (122 to 152 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 9b
PP11,270

Semi-double, true golden flowers on strong, sturdy stems – no staking needed!

Hypericum calycinum

NEW

'LORRAINE SUNSHINE'

MUST HAVE PERENNIALS®

Height: 30 in. (76 cm)
Bloom Months: June to September
USDA Hardiness Zones: 4a to 9b

Large, golden-yellow daisy flowers on erect, loosely branched plants with unique variegated leaf form.

HERBS

See page X-XI and individual listings.

HYPERICUM ●● (ST. JOHN'S WORT)

Hypericum calycinum

Height: 15 to 18 in. (38 to 46 cm)
Bloom Months: May to July
USDA Hardiness Zones: 5a to 9b

Long, blue-green leaves with wide, solitary, bright golden-yellow flowers.

NEW

HYPERICUM ●
(ST JOHN'S WORT)
Hypericum inodorum

MIRACLE SERIES

NEW FOR 2019

RENE VAN GAALEN, B.V.

Height: 28 to 32 in. (71 to 81 cm)
Bloom Months: Late Spring to Summer
USDA Hardiness Zones: 6a to 9b

A series known for striking, ornamental berries. Plants are graced with bright yellow flowers during the Summer months and with berries that attract birds and other wildlife in late-Summer through Fall. Miracle Night has wonderful red foliage. All other varieties have dark green foliage.

'SUMMER SNOWDRIFT'

NEW FOR 2019

DARWIN PERENNIALS

Height: 10 to 12 in. (25 to 30 cm)

Bloom Months: April to September

USDA Hardiness Zones: 6b to 9a

PPAF

Pure white flowers have an extremely long flowering window for a longer selling season.

- No vernalization needed for flowering.
- Extend the Iberis selling window in the South.
- Use as an alternative to Lobularia in mixed containers.
- High heat tolerance.
- Tender perennial in the South, great annual in the North.

Iberis 'Summer Snowdrift'

DARWIN PERENNIALS

LAVISH

IBERIS 
(EVERGREEN
CANDYTUFT)
Iberis gibraltarica

'LAVISH'

DARWIN PERENNIALS

Height: 10 to 12 in. (25 to 30 cm)

Bloom Months: April to August

USDA Hardiness Zones: 6a to 9b

PP27,686

Great in mixed containers!

- Long bloom time, with deep lavender flowers.
- Requires no vernalization for flowering.
- Tender perennial.

Iberis 'Lavish'

DARWIN PERENNIALS

Iberis 'White Heat'

IBERIS (CANDYTUFT)

Iberis amara

'WHITE HEAT'

DARWIN PERENNIALS

Height: 8 to 10 in. (20 to 25 cm)

Bloom Months: March to August

USDA Hardiness Zones: 7a to 10b

PP28,674

- Extremely long-blooming variety for a longer selling window.
- No vernalization needed for flowering.
- Ideal for very early sales in the South.
- High heat tolerance.
- Tender perennial.

IBERIS (EVERGREEN CANDYTUFT)

Iberis sempervirens

'ALEXANDER'S WHITE'

Height: 10 to 12 in. (25 to 30 cm)

Bloom Months: March to April

USDA Hardiness Zones: 3a to 8b

Deep green evergreen foliage is covered by dense, pure white flowers in Spring.

MONTE BIANCO

FLORENSIS, B.V.

Height: 18 to 22 in. (46 to 56 cm)

Bloom Months: Spring to early Summer

USDA Hardiness Zones: 4a to 9b

'Floribmobi' PPAF

Compact, early flowering Iberis. Great for quarts or gallons. Crisp, white flowers on medium-green foliage.

'PURITY'

Height: 8 to 10 in. (20 to 25 cm)

Bloom Months: March to April

USDA Hardiness Zones: 3a to 8b

Low-growing, evergreen shrub with deep green foliage and abundant white blooms.

SNOWFLAKE

Height: 10 to 12 in. (25 to 30 cm)

Bloom Months: Spring

USDA Hardiness Zones: 3a to 8b

Medium-habit Iberis cascades over walls or is useful as a groundcover. Evergreen foliage has long leaves; pure white flowers in early Spring appear iridescent in sunlight. Woody base can be cut back easily if needed.

Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Trailing habit of green and silver leaves with yellow flowers.

'VARIEGATUM'

Height: 12 in. (30 cm)
Bloom Months: May to June
USDA Hardiness Zones: 4a to 8b

Silver-spotted foliage with yellow flowers in Spring.

LAMIUM (SPOTTED DEADNETTLE)

Lamium maculatum

'ANNE GREENAWAY'

Height: 6 to 8 in. (15 to 20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Mixture of green, silver and chartreuse leaves turn mauve in Spring.

'BEACON SILVER'

Height: 6 to 8 in. (15 to 20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Trailing, mounded variety has silver leaves edged in green with pink-purple flowers.

'ORCHID FROST'

Height: 4 to 6 in. (10 to 15 cm)
Bloom Months: April to May
USDA Hardiness Zones: 4a to 9b
PP11,122

- Orchid-pink flowers rebloom in Fall.
- Good resistance to leaf spots.
- Low-maintenance garden performer.

'PINK PEWTER'

Height: 4 to 8 in. (10 to 20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Beautifully variegated leaves and long-blooming, soft pink flowers.

'PURPLE DRAGON'

Height: 4 to 8 in. (10 to 20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b
Available as tissue culture-raised liners
PP15,890

- Rich purple spikes contrast with bright silvery foliage.
- Snapdragon-like flowers.
- Robust habit.

'RED NANCY'

Height: 8 to 12 in. (20 to 30 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 8b

Beautifully variegated leaves and long-blooming flowers brighten shaded gardens and Summer containers. Superb groundcover beneath trees or shrubs, especially when combined with Spring-flowering bulbs. Attractive at garden's edge or along walkways.

'SHELL PINK'

Height: 8 in. (20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 4a to 8b

Soft pink flowers – excellent for shaded border or container.

'WHITE NANCY'

Height: 6 in. (15 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Fast-growing groundcover with silver and green variegated foliage and pure white flowers.

MONARDA ●●●
(BEE BALM)
Monarda

'ELECTRIC NEON PINK'

NEW FOR 2019
WALTERS GARDENS

Height: 20 to 22 in. (51 to 56 cm)
USDA Hardiness Zones: 4a to 8b
PPAF

A brand new, vibrant color for Bee Balm. Dark neon pink flowers are produced above an upright mound of glossy, dark green leaves.

'BLUE STOCKING'

Height: 24 to 48 in. (61 to 122 cm)
Bloom Months: June to August
USDA Hardiness Zones: 4a to 9b

Striking, deep violet flowers attract butterflies and hummingbirds.

DANCING BIRD

RENE VAN GAALEN, B.V.

Height: 18 to 22 in. (46 to 56 cm)
Bloom Months: June to August
USDA Hardiness Zones: 4a to 9b
'Allmobird' PPAF

Mildew-tolerant, medium-habit Monarda has a long bloom window.

GRAND PARADE™

BAILEY NURSERIES, INC.

Height: 16 to 18 in. (41 to 46 cm)
Bloom Months: June to July
USDA Hardiness Zones: 3a to 8b
'Acrade' PP19,580

Lots of lavender-purple flowers mid through late Summer, with aromatic foliage that smells like mint when crushed.

GRAND PARADE is a U.S. trademark of Bailey Nurseries, Inc.

MUEHLENBECKIA ●●●
(MAIDENHAIR VINE)
Muehlenbeckia axillaris

'NANA'

Height: 3 in. (8 cm)
Bloom Months: May to July
USDA Hardiness Zones: 6a to 10b

Bright green, rounded leaves on burgundy-green stems with tiny yellow-green flowers.

DARWIN PERENNIALS

JUNIOR WALKER™

NEPETA 
(CATMINT)
Nepeta x faassenii

JUNIOR WALKER™

DARWIN PERENNIALS

Height: 18 in. (46 cm)

Bloom Months: May to September

USDA Hardiness Zones: 5a to 8b

'Novanepjun' PP23,074

Abundant flowers in a compact habit!

- More floriferous than some other Nepeta cultivars as extensively trialed by Star® Roses & Plants.
- Lavender-blue flowers with gray-green foliage.
- Uniform flower canopy.

Nepeta Junior Walker

Nepeta 'Kitten Around'

NEPETA ●
(CATMINT)
Nepeta mussinii

'KITTEN AROUND'

NEW FOR 2019
WALTERS GARDENS

Height: 12 to 14 in. (30 to 36 cm)
Bloom Months: Late Spring to late Summer
USDA Hardiness Zones: 3a to 8b
PPAF

A cute little package of tight, round, aromatic foliage. Bright rosy purple calyxes hold periwinkle-blue flowers.

'PURRSIAN BLUE'

WALTERS GARDENS

Height: 14 to 18 in. (36 to 46 cm)
Bloom Months: Summer
USDA Hardiness Zones: 3a to 8b
PP24,788

This compact selection forms densely mounded clumps of green, aromatic foliage and nearly doubles its spread in year two. Highly floriferous; periwinkle blue flowers with dark purple calyxes are produced for months.

Nepeta 'Purrsian Blue'

Ocimum 'Kasar'

'WALKER'S LOW'

Height: 24 to 30 in. (61 to 76 cm)
Bloom Months: June to August
USDA Hardiness Zones: 3a to 8b

- One of the longest-flowering Catmints.
- Profuse blue-purple flowers complement fragrant silver leaves.
- Compact mounds spread to 24 in. (60 cm) wide.

NEPETA ●
(CATMINT)
Nepeta x faassenii

'BLUE WONDER'

Height: 12 in. (30 cm)
Bloom Months: June to August
USDA Hardiness Zones: 3a to 8b

Dwarf, mounding variety with deep purple-blue flowers and fragrant, gray-green foliage.

Nepeta 'Walker's Low'

Nepeta 'Blue Wonder'

Oenothera 'Siskiyou'

'DROPMORE'

Height: 12 in. (30 cm)
Bloom Months: May to October
USDA Hardiness Zones: 4a to 8b

Silvery, aromatic foliage and blue flowers that bloom long and freely.

LITTLE TRUDY®

PLANT SELECT

Height: 10 to 14 in. (25 to 36 cm)
Bloom Months: May to October
USDA Hardiness Zones: 4a to 9b
'Psfike' PP18,904

Deep lavender-blue flowers and serrated, narrow gray-green leaves.

LITTLE TRUDY is a U.S. registered trademark of Plant Select.

OCIMUM ●
(BASIL)

Ocimum basilicum

'KASAR'

Height: 28 to 32 in. (71 to 81 cm)
Bloom Months: None
USDA Hardiness Zones: 9a to 11

Tender perennial has purple shading from leaf base to green tip: tasty and beautiful!

Nepeta 'Dropmore'

Nepeta Little Trudy

Oenothera 'Shimmer'

PEROVSKIA ●
(RUSSIAN SAGE)
Perovskia atriplicifolia

'BLUE JEAN BABY'

WALTERS GARDENS

Height: 28 to 34 in. (71 to 86 cm)
Bloom Months: August
USDA Hardiness Zones: 4a to 9b
PPAF

A shorter, manageable Russian Sage that is still vigorous in the landscape and production. Lavender blue flowers held in smoky purple calyxes bloom for a long period starting in midsummer, with the color from the calyxes extending appeal into fall.

LACEY BLUE

CONCEPT PLANTS, B.V.

Height: 12 to 18 in. (30 to 46 cm)
Bloom Months: July to September
USDA Hardiness Zones: 4a to 9b
'Lisslitt' PP20,845

- Larger flowers for more color!
- Truly dwarf variety stays small in subsequent years.
- Features the largest flowers of any Russian Sage.
- Dense branching prevents flopping.

Perovskia 'Blue Jean Baby'

Perovskia Lacey Blue

Perovskia 'Rocketman'

Perovskia atriplicifolia

'ROCKETMAN'

WALTERS GARDENS

Height: 30 to 36 in. (76 to 91 cm)
Bloom Months: Late Summer
USDA Hardiness Zones: 4a to 9b
PPAF

A narrower, upright vase-shaped habit and relatively short stature set this new Perovskia apart. Its aromatic, gray-green, non-dissected leaves line the silvery stems, which are topped with large, fluffy textured, lavender-blue flowers.

PEROVSKIA ●
(RUSSIAN SAGE)
Perovskia atriplicifolia

Height: 36 to 60 in. (91 to 152 cm)
Bloom Months: July to September
USDA Hardiness Zones: 4a to 9b

Spikes of light blue flowers over aromatic gray-green foliage. Standard variety Perovskia.

DARWIN PERENNIALS

FLUTTER™ SERIES

DARWIN PERENNIALS

Height: 12 to 14 in. (30 to 36 cm)
Bloom Months: March to September
USDA Hardiness Zones: 5a to 9b

Compact habit and shorter peduncles for easier shipping and showing!

- Deeper colors, better habit and larger flowers than 'Butterfly Blue' and 'Pink Mist'.
- Neater displays for greater sell through at retail.
- Hardy plants with long flowering windows.
- Beautiful in the landscape and in mixed containers.
- Very disease-resistant.

Deep Blue 'Balfluttdelu' PP28,043
Pure White This stunning, pure-white addition is a unique color for the market. Self-cleaning and long-flowering. 'Balfluttrite' PPAF

TOP SELLER **Rose Pink**
'Balfluttripi' PP27,809

'BUTTERFLY BLUE'

Height: 16 to 18 in. (41 to 46 cm)
Bloom Months: May to hard frost
USDA Hardiness Zones: 4a to 9b

Compact, tidy mounds of deep green basal leaves with wiry stems hold single, round, lavender-blue flowers.

'PINK MIST'

Height: 16 to 18 in. (41 to 46 cm)
Bloom Months: June to August
USDA Hardiness Zones: 5a to 9b

- Compact, upright habit is similar to 'Butterfly Blue'.
- Green, textured leaves.
- Soft pink, fully double flowers.

SANTOLINA ● (LAVENDER COTTON)
Santolina africana

'NANA'

Height: 8 in. (20 cm)
Bloom Months: July to August
USDA Hardiness Zones: 6a to 9b

Finely divided, aromatic silver foliage and yellow button flowers.

SEDUM ● (STONECROP)
Sedum album

'ATHOUM'

Height: 6 to 8 in. (15 to 20 cm)
Bloom Months: July to August
USDA Hardiness Zones: 3a to 9b

Plump, dark green rosettes of red-tipped, evergreen leaves and light pink to white flowers.

'CORAL CARPET'

Height: 2 to 6 in. (5 to 15 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 9b

Creeping groundcover with red-tinged, deep green leaves and tiny, pale pink flowers.

SEDUM ● (STONECROP)
Sedum dasyphyllum

'MAJOR'

Height: 4 in. (10 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 9b

Prostrate mats of tight blue foliage and small, white flowers.

SEDUM ● (STONECROP)
Sedum hakonense

'CHOCOLATE BALL'

Height: 2 to 3 in. (5 to 8 cm)
Bloom Months: June to September
USDA Hardiness Zones: 6a to 9b

Little plants with brown-red, needle-like foliage bloom with yellow flowers in summer.

Sedum 'Little Miss Sunshine'

SEDUM (STONECROP)
Sedum

'LITTLE MISS SUNSHINE'

Sedum 'Dragon's Blood'

Sedum 'Fuldaglut'

SEDUM ●
(STONECROP)
Sedum reflexum

'BLUE SPRUCE'

Height: 3 to 6 in. (8 to 15 cm)
Bloom Months: July to August
USDA Hardiness Zones: 4a to 9b

Low-growing, spreading plants have blue, needle-like foliage and yellow flowers.

SEDUM ●
(STONECROP)
Sedum rupestre

'ANGELINA'

Height: 3 to 6 in. (8 to 15 cm)
Bloom Months: July to August
USDA Hardiness Zones: 3a to 9b

Low-growing and fast-spreading, with fleshy, needle-like, golden yellow foliage.

SEDUM ●
(STONECROP)
Sedum sexangulare

Height: 4 in. (10 cm)
Bloom Months: Summer
USDA Hardiness Zones: 5a to 5b

Dense carpets of fine green foliage with bright yellow flowers in Spring.

SEDUM ●
(STONECROP)
Sedum sieboldii

Height: 6 in. (15 cm)
Bloom Months: September to October
USDA Hardiness Zones: 6a to 9b

Semi-evergreen, blue-green, succulent foliage with pink flowers in Fall.

SEDUM ●
(STONECROP)
Sedum spectabile

'AUTUMN FIRE'

Height: 24 to 30 in. (61 to 76 cm)
Bloom Months: Late Summer to Fall
USDA Hardiness Zones: 3a to 9b

Dense, robust habit; flowers start blue-green and mature to pink, deep red and finally bronze.

'AUTUMN JOY'

Height: 18 to 24 in. (46 to 61 cm)
Bloom Months: Late Summer to Fall
USDA Hardiness Zones: 3a to 10b

Blue-green flower heads turn rosy pink and intensify to deep ruby red, then bronze.

'PINK BOMB'

Height: 10 to 12 in. (25 to 30 cm)
Bloom Months: Late Summer to Fall
USDA Hardiness Zones: 5a to 10b

Lovely pink flowers and uniform, compact, succulent foliage.

SEDUM ●
(STONECROP)
Sedum spurium

'DRAGON'S BLOOD'

Height: 4 to 6 in. (10 to 15 cm)
Bloom Months: July to August
USDA Hardiness Zones: 3a to 9b

Green leaves with red margins and deep red blooms in Summer. Foliage turns bright red in Fall.

'FULDAGLUT'

Height: 3 to 4 in. (8 to 10 cm)
Bloom Months: Spring to Summer
USDA Hardiness Zones: 4a to 9b

Dark green, spreading foliage with red flowers in July. Foliage turns red-orange in Fall.

Sedum 'John Creech'

Sedum 'Tricolor'

Sedum 'Coral Reef'

Sempervivum 'Ruby Heart'

SEDUM ●
(STONECROP)
Sedum spurium

'JOHN CREECH'

Height: 2 in. (5 cm)
Bloom Months: June
USDA Hardiness Zones: 3a to 9b

Dense groundcover with striking green foliage and pink-purple blooms spills from containers.

'TRICOLOR'

Height: 3 to 4 in. (8 to 10 cm)
Bloom Months: June to August
USDA Hardiness Zones: 3a to 9b

Mat-forming, with small, rounded, green leaves tinged in pink and edged in white; pink blooms.

SEDUM ●
(STONECROP)
Sedum tetractinum

'CORAL REEF'

Height: 3 to 4 in. (8 to 10 cm)
Bloom Months: July to August
USDA Hardiness Zones: 4a to 9b

Mounded, spreading groundcover has small yellow flowers and smooth green foliage that turns red in Fall.

SEDUM ●
(STONECROP)
Sedum telephium maximum

'MATRONA'

Height: 18 to 24 in. (46 to 61 cm)
Bloom Months: Late Summer to Fall
USDA Hardiness Zones: 3a to 9b

Attractive gray-green leaves edged in rose-pink complement delightful flowers that attract butterflies. Allow seed heads to remain standing for Winter interest. Excellent in the garden or landscape planting, and beautiful with Rudbeckia and Coneflowers.

SEDUM ●
(STONECROP)
Sedum x hybrida

'LEMON BALL'

Height: 6 in. (15 cm)
Bloom Months: June to July
USDA Hardiness Zones: 7a to 9b

Vivid mounds of chartreuse foliage stay dense, bushy and bright all Summer long.

'VERA JAMESON'

Height: 10 to 16 in. (25 to 41 cm)
Bloom Months: August to September
USDA Hardiness Zones: 3a to 9b

Large clusters of pink flowers and waxy, gray-green leaves turn burgundy as Summer progresses.

SEMPERVIVUM ● ●
(HENS & CHICKS)
Sempervivum

'CARMEN'

Height: 2 to 8 in. (5 to 20 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Emerald green succulent leaves with bright red tips.

'COMMANDER HAY'

Height: 1 to 3 in. (3 to 8 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Clumps of red and green rosettes.

'KALINDA'

Height: 2 to 8 in. (5 to 20 cm)
Bloom Months: June to September
USDA Hardiness Zones: 5a to 9b

Large succulent leaves held in tight green heads with blood-red tips.

'RED BEAUTY'

Height: 4 in. (10 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Dense rosettes are red in Summer and turn burgundy in cold weather. Color may vary from season to season. Produces clusters of light pink flowers in mid-Summer.

'ROYAL RUBY'

Height: 3 to 4 in. (8 to 10 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Forms dense mats of dark wine-red foliage.

'RUBY HEART'

Height: 2 to 8 in. (5 to 20 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Rosettes start red, turning green with red margins as they grow.

(HENS & CHICKS)
Sempervivum

'SILVERINE'

Height: 3 to 4 in. (8 to 10 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Muted green foliage with red overtones.

SEMPERVIVUM  
(HENS & CHICKS)
Sempervivum arachnoideum

'COBWEB'

Height: 2 to 8 in. (5 to 20 cm)
Bloom Months: June to September
USDA Hardiness Zones: 5a to 8b

Pale green rosettes covered with fine silver hairs; produces bright reddish-pink flowers.

SEMPERVIVUM  
(HENS & CHICKS)
Sempervivum tectorum

'SUNSET'

Height: 2 to 8 in. (5 to 20 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Emerald-green leaves with red tips take on orange-red cast in cool weather.

SILENE  
(CAMPION)
Silene dioica

'CLIFFORD MOOR'

Height: 18 in. (46 cm)
Bloom Months: May to July
USDA Hardiness Zones: 5a to 8b

Variegated leaves with single pink flowers.

SOLIDAGO 
(GOLDENROD)
Solidago

LITTLE LEMON

PLANTHAVEN, INC.
Height: 12 to 18 in. (30 to 46 cm)
Bloom Months: July to September
USDA Hardiness Zones: 4a to 9b
'Dansolittlem' PP17,297

Compact, well-branched plants covered with racemes of bright lemon-yellow flowers in Summer.

SOLIDAGO 
(GOLDENROD)
Solidago rugosa

'FIREWORKS'

Height: 36 to 48 in. (91 to 122 cm)
Bloom Months: July to September
USDA Hardiness Zones: 5a to 9b

Golden yellow flowers with wild, multi-branched panicles.

STACHYS 
(LAMB'S EAR)
Stachys byzantina

'HELENE VON STEIN'

Height: 12 in. (30 cm)
Bloom Months: July
USDA Hardiness Zones: 4a to 9b

- Clump-forming habit with big, broad leaves.
- Velvety-soft, greenish-silver foliage.
- Great for edging, border gardens and containers.

'SILVER CARPET'

Height: 8 in. (20 cm)
Bloom Months: June to July
USDA Hardiness Zones: 4a to 9b

Drought-tolerant, low-growing and spreading variety with soft and fuzzy, oval, gray-white leaves.

STACHYS 
(LAMB'S EAR)
Stachys monnieri

'HUMMELO'

Height: 20 in. (51 cm)
Bloom Months: June to July
USDA Hardiness Zones: 4a to 8b

Compact clumps of textured, glossy green foliage with spikes of purple flowers.

STEVIA 
(STEVIA)
Stevia rebaudiana

Height: 18 to 30 in. (46 to 76 cm)
Bloom Months: None
USDA Hardiness Zones: 9a to 11

Tender perennial used as a dietary supplement; dried leaves are many times sweeter than sugar.

TEUCRIUM 
(GERMANDER)
Teucrium chamaedrys

Height: 12 in. (30 cm)
Bloom Months: June to July
USDA Hardiness Zones: 4a to 9b

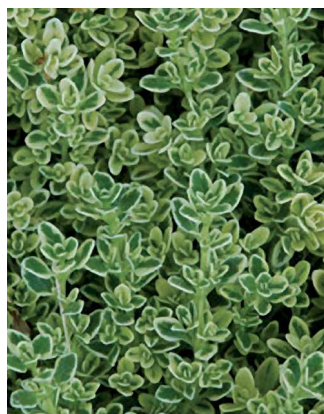

Evergreen sub-shrub with deep green leaves and rosy-purple flowers.

'PERFECTLY PICASSO'

WALTERS GARDENS

Height: 22 to 26 in. (56 to 66 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 9b
PPAF

Paintbrush-like spikes produce white buds that open to medium pink flowers, creating a bicolor look. Attractive flowers cover the top half of the plant, showing off its healthy medium green leaves on a beautifully rounded habit.

'ROYAL REMBRANDT'

WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 9b
PPAF

Discover your new Speedwell staple! Violet-purple flowers cover the top half of the plant, showcasing its dark green foliage. A remount variety; sheering will encourage reblooming later in the season.

'VERY VAN GOGH'

WALTERS GARDENS

Height: 18 to 20 in. (46 to 51 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 8b
PP27,428

A posh perennial with a unique color palette, Paintbrush-like, rosy purple flowers appear on well-branched scapes. Many secondary spikes extend the bloom time. Bright green, upright clumping foliage.

'BLUE SKYWALKER'

WALTERS GARDENS

Height: 28 to 30 in. (71 to 76 cm)
Bloom Months: Summer
USDA Hardiness Zones: 4a to 9b
PPAF

This taller perennial provides height in the garden without too much horizontal space. Lavender-blue flower spikes cover the top half of an incredibly upright, dense habit of dark green leaves.

Vinca 'Bowles Cunningham'

Vinca 'Illumination'

VERONICA (SPEEDWELL)
Veronica spicata

'GILES VAN HEES'

Height: 4 to 6 in. (10 to 15 cm)
Bloom Months: June to August
USDA Hardiness Zones: 4a to 8b

Dwarf form with dark green foliage and short, bright pink flower spikes.

'RED FOX'

Height: 12 in. (30 cm)
Bloom Months: June to September
USDA Hardiness Zones: 3a to 8b

Produces rose-red spikes in Summer.

ROYAL CANDLES

PLANTHAVEN, INC.

Height: 15 to 18 in. (38 to 46 cm)
Bloom Months: June to August
USDA Hardiness Zones: 4a to 8b
'Glory' PP18,932

Long-blooming, dwarf variety with solid, conical spikes of bright violet-blue flowers.

DARWIN PERENNIALS

'SUNNY BORDER BLUE'

Height: 18 to 24 in. (46 to 61 cm)
Bloom Months: June to August
USDA Hardiness Zones: 4a to 8b

Long display of vivid blue flower spikes atop dark green leaves.

VERONICA (SPEEDWELL)
Veronica x hybrida

'PURPLEICIOUS'

DARWIN PERENNIALS

Height: 16 to 20 in. (41 to 51 cm)
Bloom Months: June to August
USDA Hardiness Zones: 5a to 8b
PP17,639

- Long-blooming variety with intense purple flowers and dark green foliage.
- Well-branched plants have a strong, tidy habit.
- Very healthy, disease-free cultivar.

VINCA (MYRTLE)
Vinca minor

'BOWLES CUNNINGHAM'

Height: 5 to 8 in. (13 to 20 cm)
Bloom Months: April to May
USDA Hardiness Zones: 3a to 9b

Also known as 'Bowles'. Vigorous, spreading variety has thick, glossy leaves and sky blue flowers that are darker than standard *V. minor*.

'ILLUMINATION'

PLANTHAVEN, INC.

Height: 4 in. (10 cm)
Bloom Months: April to May
USDA Hardiness Zones: 4a to 9b
PP12,132

Popular, low-growing, evergreen groundcover has variegated foliage and small, light lavender-blue flowers in Spring.

DARWIN PERENNIALS

HALO

Viola Halo Series

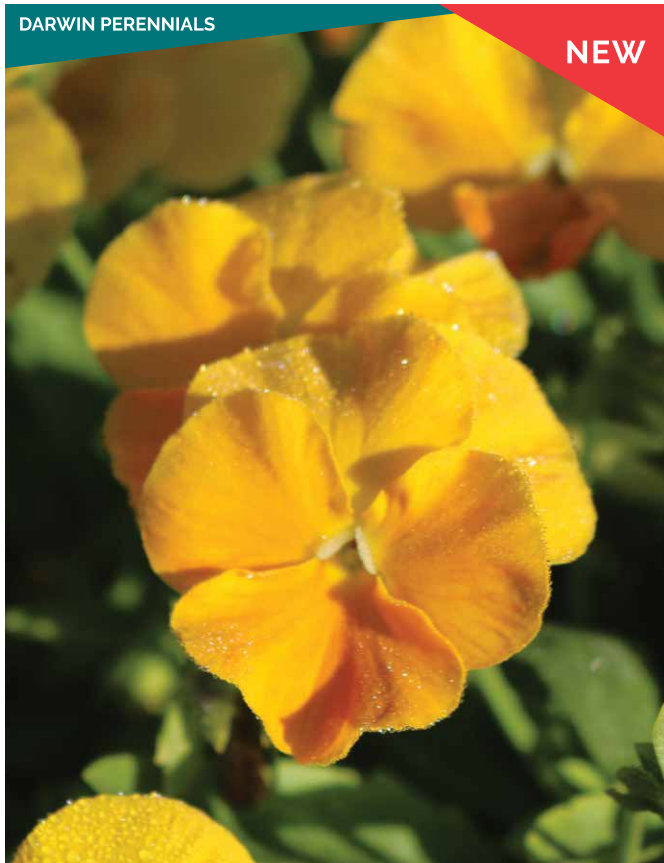

GLORIOUS BLOOMS SEEM TO LAST AN
ETERNITY – THROUGHOUT SUMMER
AND BACK AGAIN IN SPRING.

DARWIN PERENNIALS

Viola 'Halo Sky Blue'

DARWIN PERENNIALS

Viola 'Halo Violet'

VIOLA 
(VIOLET)
Viola cornuta

HALO SERIES

DARWIN PERENNIALS

Height: 8 to 10 in. (20 to 25 cm)

Bloom Months: February to April,
September to October

USDA Hardiness Zones: 5a to 9b

Excellent hardiness for long-lasting garden enjoyment.

- Very heat-tolerant.
- No vernalization required.
- Oversummers and overwinters.
- Larger flowers than Celestial.

NEW 'Halo Golden Yellow' An excellent rich, golden-yellow color addition to the series. PPAF

'Halo Lemon Frost' Extra-large, two-toned flowers captivate customers for early sales. PP26,383

'Halo Lilac' PP24,542; CPBR4837

'Halo Sky Blue' PP24,541; CPBR4838

'Halo Violet' PP24,428; CPBR4839

Viola Celestial Blue Moon

Viola Celestial Northern Lights

Viola Celestial Starry Night

Viola Celestial Twilight

Viola 'Etain'

VIOLA 
(VIOLET)
Viola cornuta

CELESTIAL™ SERIES

PLANTHAVEN, INC.

Height: 5 to 6 in. (13 to 15 cm)

Bloom Months: February to October

USDA Hardiness Zones: 5a to 10b

- Ever-blooming, early-Spring perennial in bright, rich colors.
- Oversummers and overwinters.
- Heat-tolerant, highly scented varieties bloom all Summer.
- No vernalization required.

Blue Moon 'SMEV1' PP19,882

Northern Lights 'SMEV4' PP24,591

Starry Night 'Lord Primrose' PP18,253

Twilight 'SMEV3' PP24,592

CELESTIAL is a U.S. trademark of PlantHaven, Inc.

'ETAIN'

Height: 8 to 10 in. (20 to 25 cm)

Bloom Months: February to October

USDA Hardiness Zones: 5a to 10b

Compact variety flowers profusely in Spring and Fall with large, fragrant, bicolor blooms.

VIOLA 
(VIOLET)
Viola pubescens

'REBECCA CAWTHORNE'

Height: 6 to 8 in. (15 to 20 cm)

Bloom Months: Spring

USDA Hardiness Zones: 5a to 9b

Fragrant purple flowers splashed with white; sporadic reblooming.

WALDSTEINIA 
(BARREN STRAWBERRY)
Waldsteinia ternata

Height: 4 to 6 in. (10 to 15 cm)

Bloom Months: May to June

USDA Hardiness Zones: 3a to 8b

Dense mats of semi-evergreen, strawberry-like foliage with yellow flowers.

Viola 'Rebecca Cawthorne'

Waldsteinia ternata

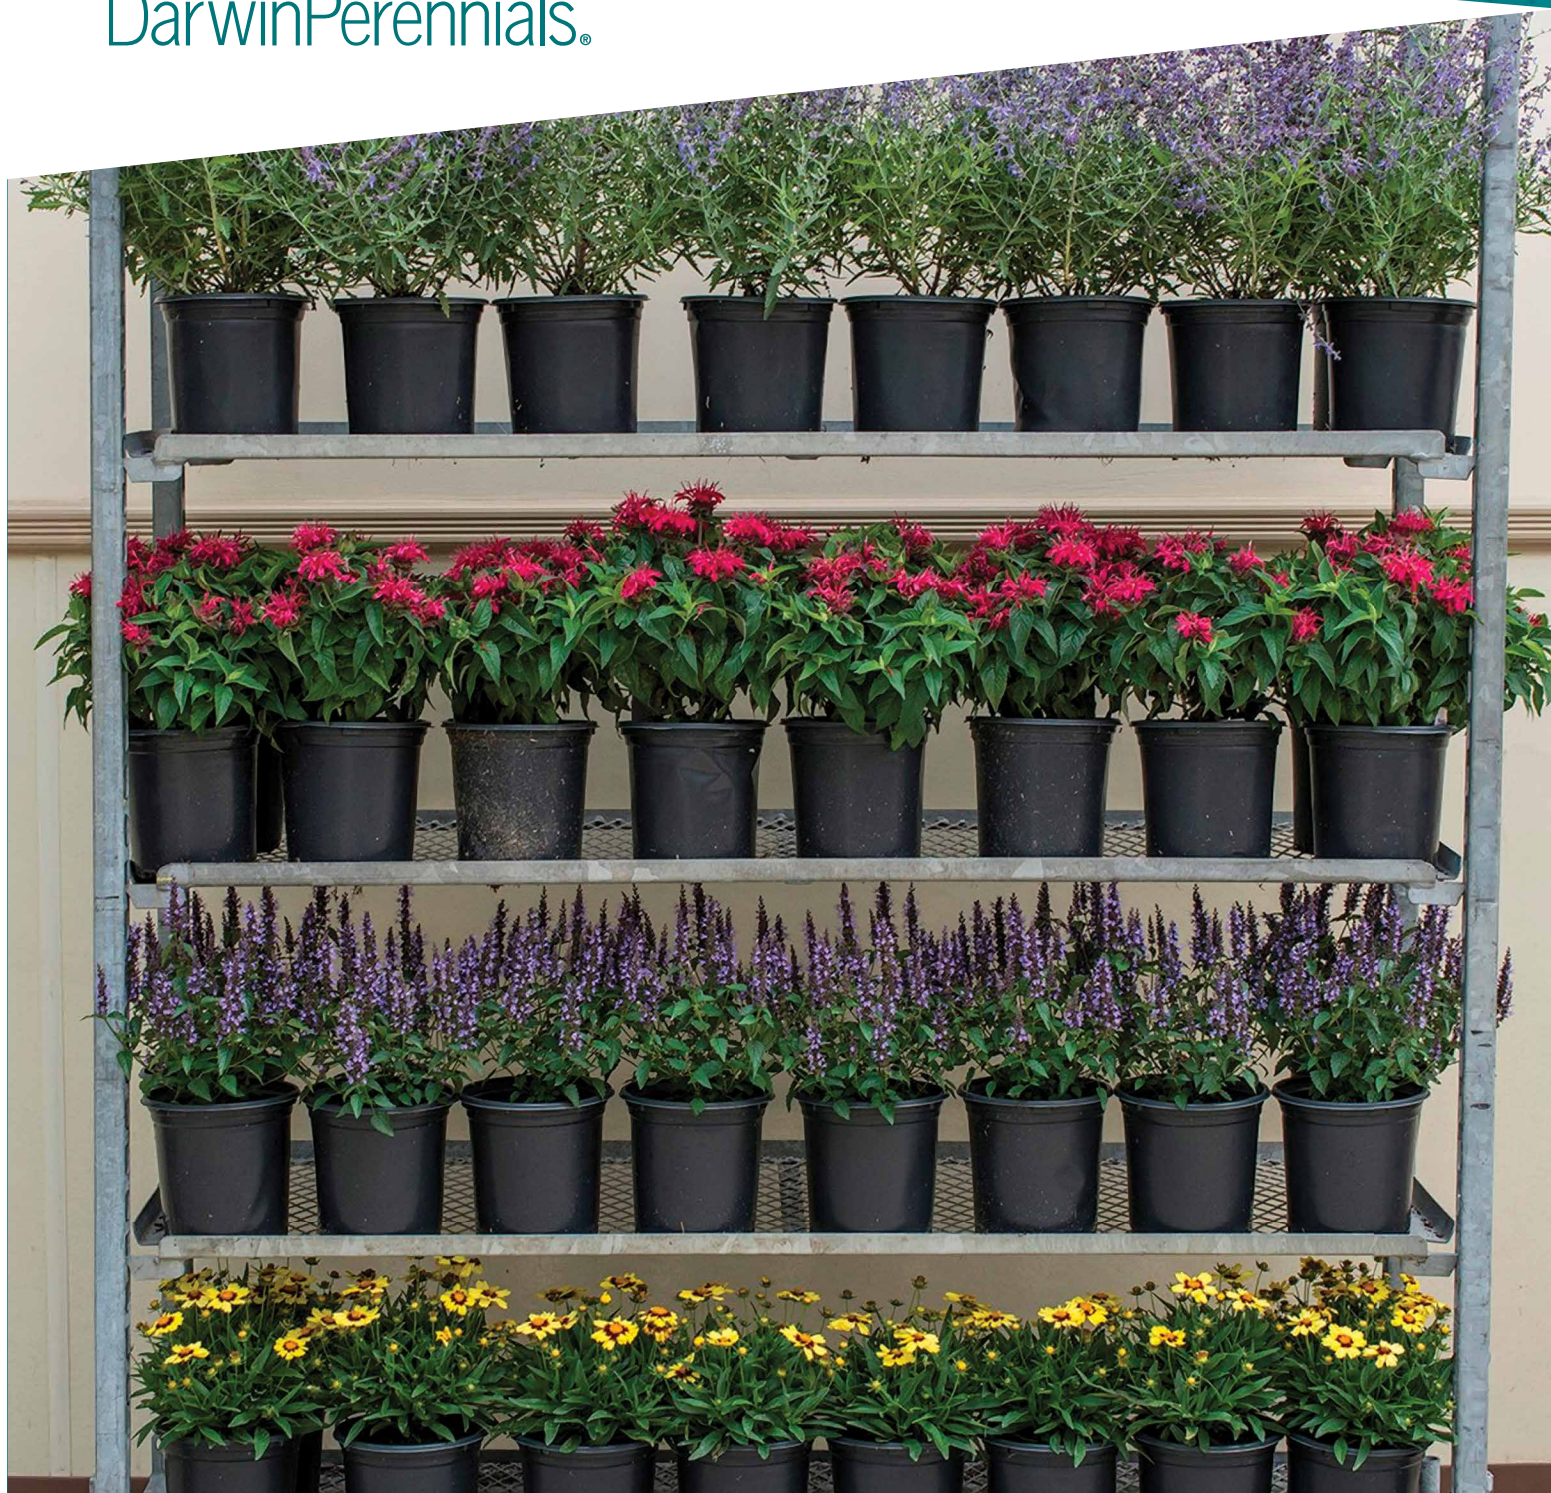

CULTURE GUIDE:
ALL YOU NEED
TO GROW
THE **FINEST**
PERENNIALS IN
THE INDUSTRY.

GROWER RESOURCES & FINISHING TRIALS

TOOLS FOR GROWING & SHIPPING BEST-QUALITY PLANTS

DarwinPerennials®

We are working to provide a quality product from start to finish – and offer solutions for your growing challenges. Resources like our finished culture research program at our facility in West Grove, PA, provide detailed schedules and finishing protocols for many of our Darwin Perennials. These schedules and trialing protocols help you bring thriving plants to retail - when you want them.

TRIALING PROGRAM GOALS

- Learn how Darwin Perennials varieties perform with varying transplant dates.
- Develop production protocols that will help growers deliver quality finished perennials to retailers, wholesalers and landscapers.
- Learn how we can use Darwin Perennials varieties to increase shoulder business sales.

TRIALS

- Includes 60+ varieties of Darwin Perennials plants.
- Added more than a dozen varieties to our trials this year.
- Also added a 4th flowering trial for Labor Day and beyond.

ADVANTAGES

- Learn how your growers can turn production space with Darwin Perennials varieties. This creates increased revenue and profit without investing in new production space.
- Retailers – increase color diversity to consumers.
- Landscapers – offer fresh color Spring, Summer and Fall.

Visit www.darwinperennials.com/Culture for a full, current listing and photos of all trialed varieties. You will also find compiled data from previous trials, additional culture and grower support information, as well as downloadable, easy-to-use scheduling tools.

NEW TO TRIALS:

Armeria Dreameria® 'Daydream'
 Armeria Dreameria 'Sweet Dreams'
 Dianthus Mountain Frost™ Pink Carpet
 Dianthus Mountain Frost Pink PomPom
 Dianthus Mountain Frost Pink Twinkle
 Dianthus Mountain Frost Rose Bouquet
 Dianthus Mountain Frost Silver Strike
 Dianthus Mountain Frost White Twinkle
 Leucanthemum 'White Magic'
 Phlox 'Cherry Cream'
 Salvia 'Rose Marvel'
 Scabiosa Flutter™ Pure White

	MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
	Low to moderate	50-75 ppm N	Not necessary. remove premature flowers.	28-35 days after sticking	Do not over-mist.
	Low to moderate	50-75 ppm N	Not necessary. remove premature flowers.	28-35 days after sticking	Do not over-mist.
	Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Stick cuttings the day of arrival, if possible.
	Low	50-75 ppm N	Recommended.	35-42 days after sticking	This alyssum requires light mist and soil moisture. Can be rooted under a dome or tent. Do not over-mist.
	Low	100 ppm N starting at Day 7	Not necessary.	42-45 days after sticking	Quite easy to propagate. Do not over-mist. Remove from mist after 10 to 12 days. Allow media to dry slightly between irrigations to encourage root development.
	Low to moderate	50-75 ppm N	Not necessary in liner stage.	35-42 days after sticking	Discontinue mist as quickly as possible once rooting occurs.
	Moderate	50-75 ppm N	Pinch once in the liner stage.	28-35 days after sticking	Begin fertilizing 7 days after stick. Avoid over-misting.
	Moderate	50-75 ppm N	Pinch once in the liner stage.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Moderate	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low	50-75 ppm N	Pinch once in the liner stage and once after transplant for best results.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Very low	50 ppm N starting at Day 7	Pinch to remove any flower buds.	42-49 days after sticking	Dianthus require very low mist settings to root. Over-misting will result in slow rooting and high losses in propagation.
	Low to moderate	50-75 ppm N	Not typical in propagation.	42-49 days after sticking	Foxlight Digitalis root slowly with first roots showing 15 to 18 days after stick. However, it is best to discontinue mist prior to visible root, as they root more quickly when not over-misted and when media is allowed to dry slightly between waterings.
	Low	Begin feeding 50-75 ppm 10 days after sticking	Pinch 21-25 days after sticking.	42-49 days after sticking	Don't oversaturate media. Low mist levels work best.
	High for first few days, then reduce to moderate	50-100 ppm N	Recommended.	42-49 days after sticking

	MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
	Low	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	75-100 ppm N when roots become visible; increase to 150-200 ppm N as roots develop	Yes, 7 days before transplanting.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Moderate	50-75 ppm N	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.	42-49 days after sticking	Pinch once in the liner stage.
	Low	Feed at 100 ppm N after 9 days	Pinch once shoots elongate for best branching.	35-42 days after sticking	Typically remove from propagation area after two weeks. Don't keep rooting media excessively wet. Use long-day lighting when propagating when day length is less than 12 hours.
	Low	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation. Long day obligate plant. Must provide long days in propagation.
	Low to moderate	50-75 ppm N after 14 days	Not necessary.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation. Cuttings typically arrive with flowers already induced due to cool night temperatures in Colombia. Non-induced cuttings require 6 weeks of night temperatures below 55°F (13°C) to flower.
	Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	50-75 ppm N when roots become visible	Recommended after roots are established. Leave 4-5 active internodes.	28-35 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	100 ppm N starting at Day 10	Yes, pinch after 4 weeks. Can be double pinched in the liner stage for even greater branching.	42-49 days after sticking depending on number of pinches	Iberis benefit from a basal IBA dip prior to sticking. Do not over-mist or high losses can occur.
	Low; prefers high humidity to mist	50-75 ppm N	Recommended.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low; prefers high humidity to mist	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low	50-75 ppm N	Not typically necessary.	42-56 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C). Remove flowers in propagation.
	Low to moderate	75-100 ppm N starting at Day 7	Pinch while young plants are soft and actively growing.	35-42 days after sticking	Pinch any premature buds as they become visible.

	Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
	Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
	Low to moderate	50-75 ppm N when roots become visible	Recommended	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media.
	Moderate to high for first 24 hours, then reduce to low	50-75 ppm N	Recommended.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
	Moderate to high for first 24 hours, then reduce to low	50-75 ppm N after 10 days	Recommended.	35-42 days after sticking	Do not over-saturate rooting media. Allow media to dry moderately starting 10 days after sticking to encourage root development.
	Low to moderate	75-100 ppm N starting at Day 7	Yes, while young plants are soft and actively growing.	42-49 days after sticking	Plants grow more actively under long days. Use 13-hour extended day lighting for Winter propagation.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Use low mist settings; do not oversaturate rooting media. Root zone temperatures of 70°F (21°C).
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
	Low to moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Begin fertilizing 7 days after stick.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
	Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt. Begin feeding 7 days after sticking with 50-75 ppm N.
	Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt.
	Low	50-75 ppm N at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Discontinue mist as quickly as possible and only mist to avoid leaf wilt. Begin feeding 7 days after sticking with 50-75 ppm N.
	Low	50-75 ppm starting at Day 7	A soft pinch will increase branching.	35-42 days after sticking	Over-misting and saturated propagation media will dramatically delay rooting and increase rooting losses. Discontinue mist as quickly as possible and only mist to avoid leaf wilt.

	MIST	FERTILIZATION	PINCHING	TRANSPLANTING	COMMENTS
	Low to moderate	75-100 ppm N starting at Day 10	Typically not necessary. Remove premature flower buds as they appear.	42-49 days after sticking	Scabiosa cuttings are sensitive to over-misting and over-watering in propagation.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
	Moderate	50-75 ppm N	Recommended after roots are established. Leave 4-5 active internodes.	35-42 days after sticking	Roots quickly. Plan to pinch in liner tray.
	Moderate for first 24-48 hours, then reduce to low	50-75 ppm N at Day 7	Soft pinch recommended 25-28 days after sticking.	35-42 days after sticking	Excessive media moisture will slow rooting. Begin fertilizing at Day 7 with 75 ppm N.

46, 47		HELIOPSIS <i>Heliopsis helianthoides</i>	Double Sunstruck, Sunstruck	5.8-6.2	Nights: 55 to 65°F (13 to 18°C) Days: 65 to 75°F (18 to 24°C)	Long day obligate	Beneficial; aids in bulking.	5,000 to 8,000	Allow media to dry slightly between watering.	Use a balanced fertilizer at a rate of 150 to 175 ppm.	
6-7		HEUCHERA <i>Heuchera x hybrida</i>	Carnival Series	5.8-6.2	Nights: 50 to 55°F (10 to 13°C) Days: 60 to 65°F (16 to 18°C)	Day length neutral	No	1,500 to 2,500	Allow media to dry slightly between watering.	Use a balanced fertilizer at a rate of 100 to 125 ppm.	
48		IBERIS <i>Iberis amara</i>	Summer Snowdrift	5.8-6.2	Nights: 45 to 55°F (7 to 13°C) Days: 55 to 65°F (13 to 18°C)	Day length neutral	Cuttings supplied from Darwin Colombia receive enough cold to induce flowering; growers do not need to vernalize.	3,000 to 5,000	Allow media to dry regularly between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
50		IBERIS <i>Iberis amara</i>	White Heat	5.8-6.2	Nights: 45 to 55°F (7 to 13°C) Days: 55 to 65°F (13 to 18°C)	Day length neutral	No	3,000 to 5,000	Allow media to dry regularly between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
49		IBERIS <i>Iberis gibraltarica</i>	Lavish	5.8-6.2	Nights: 45 to 55°F (7 to 13°C) Days: 55 to 65°F (13 to 18°C)	Day length neutral	Yes	3,000 to 5,000	Allow media to dry regularly between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
51		IBERIS <i>Iberis sempervirens</i>	Snowsation	5.8-6.2	45-60°F (7-16°C)	Day length neutral	Yes	3,000 to 5,000	Low to moderate.	Use a balanced fertilizer at a rate of 150 to 175 ppm N.	
54		LAVANDULA <i>Lavandula angustifolia</i>	SuperBlue	5.9-6.2	Nights: 55 to 65°F (13 to 18°C) Days: 65 to 75°F (18 to 24°C)	Long day facultative	No	5,000 to 8,000	Allow media to dry slightly between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
55-56		LAVANDULA <i>Lavandula stoechas</i>	Anouk Series, Bright Luxurious, Luxurious	5.8-6.2	Nights: 56 to 64°F (13 to 18°C) Days: 65 to 76°F (18 to 24°C)	Day length neutral	Beneficial for earlier flowering and more blooms.	5,000 to 8,000	Allow media to dry slightly between watering.	Use a balanced fertilizer at a rate of 100 to 125 ppm.	
57		LEUCANTHEMUM <i>Leucanthemum x superbum</i>	Santé	5.8-6.2	Nights: 55 to 65°F (13 to 18°C) Days: 60 to 65°F (16 to 18°C)	Long day obligate	Beneficial for bulking and earlier flowering	5,000 to 8,000	Allow media to dry slightly between watering.	Use a balanced fertilizer at a rate of 125 to 150 ppm.	
58		LEUCANTHEMUM <i>Leucanthemum x superbum</i>	White Magic	5.8-6.2	55 to 65°F (13 to 18°C)	Long day facultative	No	5,000 to 8,000	Moderate. More required when in flower.	Use a balanced fertilizer at a rate of 150 to 200 ppm N.

DARWIN PERENNIALS ESSENTIAL CULTURE GUIDE

UPON RECEIPT

Unrooted perennials should be stuck as quickly as possible. Tender cuttings such as *Artemisia*, *Agastache*, *Lavandula*, *Perovskia* and *Salvia* should be immediate priority. Cuttings that cannot be stuck immediately should be maintained in a cooler at 40 to 45°F (4 to 7°C). Refer to the Propagation Guide for crop-specific suggestions. Generally speaking, herbaceous perennials benefit from a basal stem dip of IBA rooting hormone to speed up the rooting process. Be careful with misting levels. Perennials suffer from receiving too much mist more often than from too little mist.

Rooted perennials should be unpacked and inspected for active root growth. It is often preferable to place recently received perennial liners on a bench or the ground for a few days to help them overcome transport stress. This is particularly important for liners that have been shipped in boxes. Water on arrival and look for new root activity prior to transplant, if possible.

AT TRANSPLANT

Well-rooted and toned perennial liners are able to withstand transplant stress very well. Critical to success, provide newly transplanted perennials with immediate irrigation. Watering at the end of the transplant line rather than after you've filled a bed greatly improves uniformity of new root establishment. In any case, do not allow media surface to dry after transplant for the first several days until new roots are extending into the media. Perennials do not like to be planted too deep. Generally speaking, perennial liners should be planted level with the soil surface.

Use a well-drained media containing properly composted bark. These types of perennial soil media are readily available. It is important that the media incorporates a surfactant to help ensure proper wetting and re-wetting of the media. The media should be stabilized to a pH of 5.8 to 6.2 and an EC of 1 to 1.2 using the Saturated Media Extract (SME) method.

FERTILIZATION

Perennials can be fed using liquid fertilizers on a periodic or constant feed basis. Liquid fertilizer rates can be found in the Perennial Finishing Guide. Use a balanced formula that complements the pH and alkalinity of your irrigation water. Liquid fertilizing offers advantages of greater flexibility and control over fertility levels, but can be difficult to administer economically when overhead irrigation is used. In the case of overhead irrigation, controlled release fertilizers (CRF) are preferable. Incorporate CRF into the media prior to planting based on manufacturer's recommendations or top-dress after planting.

SPACING

Spring-planted perennials should be spaced to finished spacing after transplant. This allows better growing conditions and helps to avoid overcrowding and stretch. The added airflow will help reduce foliar diseases and allow for better insect control.

Fall-planted perennials can be spaced at transplant in temperate climates or placed pot-tight in climates where temperatures cause containers to freeze. In either case, proper spacing for the anticipated finished size of the plant will dramatically improve plant quality and reduce labor.

INSECTS AND DISEASES

Incoming perennial liners or cuttings should be inspected for pests and diseases. Apply appropriate treatments as needed.

After transplant, regular scouting and careful observation is critical to maintaining a healthy crop. The practice of integrated pest management (IPM) will reduce losses and pesticide costs by identifying and correcting problems before they escalate. If a pesticide treatment is necessary, please refer to the manufacturer's label regarding proper usage. It is always a good practice to test new varieties for phytotoxicity when making pesticide applications.

VERNALIZATION AND BULKING

A number of perennial species require a period of cold temperature exposure to flower. The length of time varies from just a few weeks below 50°F (10°C) to as much as 10 weeks below 40°F (4°C). Generally speaking, early Spring-flowering perennials like *Phlox subulata*, *Iberis* and *Alyssum* require a cold period to flower. Many perennials such as *Salvia nemorosa*, *Monarda* and *Phlox paniculata* do not require vernalization to flower, but do benefit from a cold, short day bulking period. In these cases, Summer or Fall planting increases root and crown mass and the corresponding flowering shoots on the plants. It has also been shown to hasten flowering in many species by up to four weeks.

OVERWINTERING

The keys to success when overwintering perennials are:

- Avoid standing water
- Provide adequate air circulation
- Use preventative disease treatments
- Remove dead leaf/tissue
- Utilize rodent control
- Low media EC when entering dormancy
- Avoid freeze and thaw cycles

The overwintering area, whether in a field or hoop-house, should be sloped so that rain or other water sources cannot accumulate. In climates where Winter conditions freeze and thaw, cover prior to freeze and uncover as soon as possible. Where temperatures remain below freezing, cover after first freeze and maintain the cover until late Winter or early Spring when weather moderates. Remove dead and abscising leaves from herbaceous perennials like *Hosta*, *Monarda*, *Heliopsis* and dormant *Hemerocallis*. Apply a broad spectrum fungicide prior to covering or closing hoop houses to reduce disease pressure.

Once weather conditions moderate, be sure to scout for insect and disease problems and respond accordingly. Also, check pH and EC levels in the media. Perennials that emerge from dormancy will begin to grow rapidly, and the lack of adequate nutrition will lead to reduced branching, lower leaf loss and smaller flowers.

TERMS & CONDITIONS OF SALE

NOTE: DARWIN PERENNIALS IS A DIVISION OF BALL HORTICULTURAL COMPANY (BALL). DARWIN PERENNIALS TERMS & CONDITIONS OF SALE ARE COUNTRY/ REGION SPECIFIC. VISIT DARWINPERENNIALS.COM FOR CURRENT TERMS & CONDITIONS. THE FOLLOWING TERMS & CONDITIONS OF SALE APPLY TO UNROOTED CUTTINGS OR ROOTED LINERS SOLD BY BALL WITHIN THE UNITED STATES AND CANADA.

ACCEPTANCE OF TERMS

These terms and conditions shall govern orders for plants, supplies and other materials (merchandise) placed with Seller. All negotiations with sales representatives or other agents of Seller are merged herein. No modification of these terms and conditions shall be effective unless in writing signed by Seller. Placement of the order shall constitute Purchaser's acceptance of these terms and conditions. All orders are subject to acceptance by Seller at our offices in West Chicago, Illinois.

LIMITATION OF WARRANTY

Seller warrants, to the extent required by law that merchandise conforms to the description appearing in Seller's catalog and on container labels, within recognized tolerances. SELLER MAKES NO OTHER OR FURTHER WARRANTY, EXPRESS OR IMPLIED. ALL OTHER OR FURTHER WARRANTIES, INCLUDING ANY WARRANTIES OF MERCHANTABILITY, TITLE, NON-INFRINGEMENT, AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. Certain merchandise may be separately warranted by the manufacturer. Seller does not adopt or ratify any manufacturer warranties, express or implied, and Seller shall have no liability thereunder. Seller does not adopt or ratify any manufacturer warranties, express or implied, made by Purchaser upon resale of the merchandise, and Seller shall have no liability thereunder.

LIMITATION OF REMEDY

PURCHASER'S SOLE AND EXCLUSIVE REMEDY SHALL BE REFUND OF THE PURCHASE PRICE. SELLER'S LIABILITY, WHETHER FOR BREACH OF CONTRACT, BREACH OF WARRANTY, NEGLIGENCE, PRODUCTS LIABILITY OR ANY OTHER THEORY OF LIABILITY, IS LIMITED TO THE AMOUNT OF THE PURCHASE PRICE. UNDER NO CIRCUMSTANCES SHALL SELLER BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE, OR FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES.

MANDATORY ARBITRATION

ANY CLAIM WHICH PURCHASER MAY HAVE AGAINST SELLER ARISING OUT OF OR RELATING TO THE SALE OF THE MERCHANDISE SHALL BE SETTLED BY BINDING ARBITRATION IN ACCORDANCE WITH THE COMMERCIAL ARBITRATION RULES OF THE AMERICAN ARBITRATION ASSOCIATION, SAID ARBITRATION TO BE VENUED IN COOK OR DUPAGE COUNTIES, ILLINOIS.

GOVERNING LAW, JURISDICTION & VENUE

The laws of the State of Illinois, including but not limited to the Uniform Commercial Code as adopted therein, shall govern all matters arising out of or relating to Seller's sale of merchandise. ANY DISPUTE NOT SUBJECT TO ARBITRATION AND ANY ACTION TO ENFORCE AN ARBITRATION AWARD ARISING OUT OF OR RELATING TO THE SALE OF MERCHANDISE HEREUNDER SHALL BE MAINTAINED IN THE STATE OR FEDERAL COURTS LOCATED IN DUPAGE OR COOK COUNTIES, ILLINOIS, AND PURCHASER SUBMITS TO THE JURISDICTION OF AND VENUE IN SAID COURTS.

INDEMNITY

By accepting merchandise, Purchaser agrees to defend Seller, to hold it harmless and indemnify it from and against any claim or loss asserted by any or all transferees of such merchandise or users of the products of such merchandise who are not notified by Purchaser in writing of Limitation of Warranty, Limitation of Remedy, Mandatory Arbitration, Governing Law Jurisdiction and Venue in language substantially equivalent to that contained in these Terms and Conditions of Sale.

PRICES

All prices are subject to change without notice. The price in effect at time of shipment will prevail. Prices do not include installation; Seller takes no responsibility, and shall have no liability for installation. Additional processing and handling charges may be added.

PAYMENT

Payment is due in invoiced currency and in accordance with the terms specified on invoice. In the event of default in the payment of any amount when due, and in addition to all other rights and remedies available to Seller, SELLER SHALL BE ENTITLED TO COLLECT A LATE CHARGE OF 2% PER MONTH (24% PER YEAR) OR THE MAXIMUM RATE ALLOWED BY LAW, WHICHEVER IS LESS, ON ALL AMOUNTS PAST DUE FROM THE DATE DUE UNTIL THE DATE PAID. A FEE OF \$25.00 WILL BE CHARGED FOR ANY RETURNED CHECK, DECLINED EFT TRANSACTION OR DECLINED BANKCARD TRANSACTION.

If paying by Pre-Authorized Debit (PAD), or EFT, please note you have waived your right to receive pre-notification of the amount of the PAD and agreed that you do not require advance notice of the amount of PADs before the debit is processed. You have certain recourse rights if any debit does not comply with these terms. For example, you have the right to receive a reimbursement for any PAD that is not authorized or is not consistent with this PAD agreement. To obtain more information on your recourse rights, contact your financial institution.

FREIGHT & HANDLING CHARGES, INSPECTION, DAMAGED GOODS

The freight and handling charge on Purchaser's invoice covers shipment of the merchandise to Purchaser's destination, and replacement or credit for damaged merchandise if the steps listed here are followed. PURCHASER WILL NOT REFUSE OR RETURN GOODS, OR THE RIGHT TO FILE A CLAIM IS LOST AND PURCHASER WILL STILL BE LIABLE FOR THE MATERIAL AND THE FREIGHT. When Purchaser receives shipment: 1) Count all cartons. 2) Inspect all cartons for external damage. 3) Check for open or resealed cartons. 4) Note any damages, shortages, open or resealed cartons on the delivery receipt; the carrier's representative must also sign the receipt. 5) Open all boxes immediately and inspect for damage such as scorched, frozen or broken plants; material shortages; etc. NOTIFY SELLER

IMMEDIATELY IF A SHIPMENT IS DAMAGED. Call your sales representative to report the damage and receive details on what is needed to file a claim.

CANCELLATION POLICY

Cancellations for unrooted cuttings must be received at least thirty (30) days prior to scheduled ship date. Cancellations for liners must be received prior to stick or sow date.

NOTICE & RETURN

Seller shall have no liability for any defect unless notice is given promptly, not to exceed thirty (30) days after such defect is or should have been discovered. No merchandise may be returned without Seller's prior written authorization.

DELAYS, SHORTAGES & SUBSTITUTIONS

Seller shall not be responsible for delays in delivery or for losses resulting from such delays. Seller reserves the right to make partial shipment. In the event of shortages, Seller may substitute such other, similar merchandise as is available.

PLANT PROTECTION

Varieties described herein may be covered by the Flowering-Only License Agreement, United States Plant Patents, Utility Patents, and/or Plant Breeders Rights. These varieties may not be reproduced without authorization. The breeder or authorized representative has the right to inspect customers' nurseries during normal business hours to assess compliance with the restrictions on use of protected varieties.

TRADEMARKS

® denotes a U.S. registered trademark and ™ denotes a trademark of Ball Horticultural Company, unless otherwise indicated.

SALES LIMITATIONS

THE COMPANY'S PRODUCTS MAY NOT BE SOLD, DIVERTED, TRANSFERRED OR RE-EXPORTED, DIRECTLY OR INDIRECTLY, TO ANY INDIVIDUAL, ENTITY, OR DESTINATION THAT IS SUBJECT TO UNITED STATES OR UNITED NATIONS SANCTIONS PROGRAMS OR EMBARGOS (INCLUDING BUT NOT LIMITED TO OFAC SANCTIONS PROGRAMS AND THOSE LISTED ON OFAC'S "SPECIALLY DESIGNATED NATIONALS" LIST) WITHOUT AN APPROPRIATE EXPORT LICENSE.

ALL SHIPMENTS MUST BE SHIPPED IN COMPLIANCE WITH THE FOREIGN CORRUPT PRACTICES ACT AND THE UK BRIBERY ACT.
